1.5 Sisonke DM Catalytic Projects

# A: EXECUTIVE SUMMARY

# 1. Overview of the Sisonke District Municipality (Who are we?)

The Sisonke District Municipality is located to the South West of the KwaZulu-Natal province. Its population is sparsely spread throughout an area of 11 127. 89997 square kilometers. The Sisonke District municipality forms part of the border between KwaZulu-Natal and Eastern Cape Province. The District Management Area (DMA) is located to the West of the District and it forms part of the border between the KwaZulu-Natal Province and Lesotho. The Sisonke District Municipality (DC43) is composed of the following five local municipalities: Ubuhlebezwe; Ingwe; Kwa-Sani; Greater Kokstad and Umzimkhulu.

# **Provincial Location Context**

The Sisonke District Municipality is one of the ten District Municipalities that forms part of the KwaZulu-Natal Province. It is located at the extreme south of the Province. The Sisonke District Municipality is bordered by the following District Municipalities: Uthukela to the North; Umgungundlovu to the North East; Alfred Nzo and Ugu to the South East; and OR Tambo to the South.

The location of the District in relation to the aforesaid District municipalities means that, any planning and developmenttaking place in each District will have an impact on the neighboring Districts. It is therefore imperative to align planning and development activities between the Sisonke District Municipality and the respective District Municipalities.

# **Demographic Profile**

The Sisonke District Municipality (DC43) is one of the ten District Municipalities in KwaZulu-Natal Province and is located South-West of the province. The District Municipality forms part of the boarder between KwaZulu-Natal and Eastern Cape Province. The District Management Area (DMA) is located to the West of the District and it forms part of the boarder between the KwaZulu-Natal Province and Lesotho (Sisonke IDP). It includes the southern most part of the UKhahlamba Drakensberg National Park adjacent to Lesotho and borders Eastern Cape Province in the west. The municipality area size is 11 127. 89997 km<sup>2</sup> (COGTA). Key rivers in the district are the Umzimkhulu and Umkomaas rivers.

# Number of Wards and Traditional Authority

| Municipality                       | Number of Wards |
|------------------------------------|-----------------|
| KwaSani Local Municipality         | 4               |
| Greater Kokstad Local Municipality | 8               |
| Ingwe Local Municipality           | 11              |
| UBuhlebezwe Local Municipality     | 12              |
| Umzimkhulu Local Municipality      | 20              |

# 7. How will progress be measured?

Sisonke has developed its Performance Management System, reviewed annually, that will be derived from departmental performance reviews that takes place on monthly, quarterly, bi-annually and annually. The Executive Committee performance reviews will be conducted quarterly and the Council and public review will be done annually.

The Municipal Manager will coordinate and ensure good quality of reporting and reviews and will also ensure conformity to reporting formats and check the reliability of reported information where possible through the Internal Audit Unit.

# **SECTION B 1: PLANNING AND DEVELOPMENT PRINCIPLES**

| PLANNING AND DEVELOPMENT PRINCPLES   | APPLICATION OF PRINCIPLES                              |
|--|--|
| Development / investment must only happen in locations that are sustainable ( <i>NSDP</i> )  | Contextualised in from 129 to 139 for spatial planning |
|  |  |
| Balance between urban and rural land development in support of each other ( <i>DFA Principles</i> )  | Page 19 and 21   |
|  |  |
| The discouragement of urban sprawl by encouraging<br>settlement at existing and proposed nodes and settlement<br>corridors, whilst also promoting densification. Future<br>settlement and economic development opportunities should<br>be channeled into activity corridors and nodes that are<br>adjacent to or that link the main growth centres ( <i>DFA</i><br><i>Principles</i> ) | Contextualised in from 129 to 139 for spatial planning |
|  |  |
| The direction of new development towards logical infill areas ( <i>DFA Principles</i> )  | Contextualised in from 129 to 139 for spatial planning |
|  | Finer details are at LM level                          |
|  |  |
| Compact urban form is desirable ( <i>DFA Principles</i> )  | Contextualised in from 129 to 139 for spatial planning |
|  | Finer details are at LM level                          |
|  |  |
| Development should be within limited resources (financial, institutional and physical). Development must optimise the use of existing resources and infrastructure in a sustainable manner ( <i>DFA Principles, CRDP, National Strategy on Sustainable Development</i> )   | Contextualised in from 129 to 139 for spatial planning |
|  |  |
| Stimulate and reinforce cross boundary linkages.   | Page 19 to 21  |
|  |  |
| Basic services (water, sanitation, access and energy) must be provided to all households ( <i>NSDP</i> )   | ?  |
|  |  |
| Development / investment should be focused on localities of economic growth and/or economic potential ( <i>NSDP</i> )  | Contextualised in from 129 to 139 for spatial planning |
|  |  |
| In localities with low demonstrated economic potential,<br>development / investment must concentrate primarily on<br>human capital development by providing education and<br>training, social transfers such as grants and poverty-relief  | P 86   |

| programmes ( <i>NSDP</i> )   |   |
|--|---|
|  |   |
| Land development procedures must include provisions that accommodate access to secure tenure ( <i>CRDP</i> )   | Page 26   |
|  |   |
| Prime and unique agricultural land, the environment and other protected lands must be protected and land must be safely utilised   | Page 29 to 43   |
|  |   |
| Engagement with stakeholder representatives on policy,<br>planning and implementation at national, sectoral and local<br>levels is central to achieving coherent and effective planning<br>and development.  | ?   |
|  |   |
| If there is a need to low-income housing, it must be provided<br>in close proximity to areas of opportunity ( <i>"Breaking New</i><br><i>Ground": from Housing to Sustainable Human Settlements</i> )  | LMs   |
|  |   |
| During planning processes and subsequent development, the reduction of resource use, as well as the carbon intensity of the economy, must be promoted ( <i>National Strategy on Sustainable Development</i> )  | ?   |
|  |   |
| Environmentally responsible behavior must be promoted through incentives and disincentives ( <i>National Strategy on Sustainable Development, KZN PGDS</i> ).  | Page 29 to 43   |
|  |   |
| -The principle of self-sufficiency must be promoted.<br>Development must be located in a way that reduces the need<br>to travel, especially by car and enables people as far as<br>possible to meet their need locally. Furthermore, the principle<br>is underpinned by an assessment of each areas unique | Contextualised in from 129 to 139 for<br>spatial planning<br>Finer details to be considered at LM |
| competencies towards its own self-reliance and need to consider the environment, human skills, infrastructure and capital available to a specific area and how it could contribute to increase its self-sufficiency ( <i>KZN PGDS</i> )  | level   |
|  |   |
| Planning and subsequent development must strive to provide the highest level of accessibility to resources, services and opportunities ( <i>KZN PGDS</i> )   | Contextualised in from 129 to 139 for spatial planning  |

# **SECTION B 2: GOVERNMENT POLICIES AND IMPERATIVES**

| NATIONAL/               | ISSUE RAISED                           | MUNICIPAL RESPONSE                |
|-------------------------|--|-----------------------------------|
| PROVINCIAL              |  |                                   |
| PERSPECTIVE             |  |                                   |
|                         |  |                                   |

# **C: SITUATIONAL ANALYSIS**

# Spatial and Environmental Analysis

### 1.1 Regional Context

The Sisonke District Municipality (DC43) is one of the ten District Municipalities in KwaZulu-Natal Province and is located South-West of the province. The District Municipality forms part of the boarder between KwaZulu-Natal and Eastern Cape Province. The District Management Area (DMA) is located to the West of the District and it forms part of the boarder between the KwaZulu-Natal Province and Lesotho (Sisonke IDP). It includes the southern most part of the UKhahlamba Drakensberg National Park adjacent to Lesotho and borders Eastern Cape Province in the west. The municipality area size is 11 127. 89997 km<sup>2</sup> (COGTA). Key rivers in the district are the Umzimkhulu and Umkomaas rivers.

The Sisonke District Municipality (SDM) is comprised of the following Local Municipalities:

- Greater Kokstad Municipality
- Ingwe Municipality
- KwaSani Municipality
- uBuhlebezwe Municipality
- Umzimkhulu Municipality
- Umkhomazi Wilderness Area

The SDM is bordered by the following District Municipalities: Uthukela to the North; uMgungundlovu to the North East; Alfred Nzo: Ugu to the South East; and OR Tambo to the South (Sisonke IDP 2011/2012).

KwaSani Local Municipality is the gateway to UKhahlamba Drakensberg Park World Heritage Site.

Sisonke is well known for high agro-ecological potential due to an abundance of high quality soils, high altitude, and abundant water. Commercial farms and to large extent commercial plantations form the bedrock of the economy of the region. Climatic extremes make the area suitable for a variety of products including crops and vegetables, livestock and sugar cane around Ixopo/ Highflats area

### **1.2 Administrative Entities**

The SDM is predominantly rural characterized by small urban centres with larger agricultural, plantations, natural vergetion and traditional authority land. These small urban centres serves as economic hubs for these sub-regions and as administrative areas. According to the municipal demarcation, these administrative areas have been arrange to form five Local Municipalities as depicted in (Map ....)

# **1.3 Structural Element**

See 1.4 below

#### **1.4 Existing Nodes and Corridors**

The main SDF document was approved in March 2008 and is being reviewed annual. Since the SDF is a scientific and a policy framework the review process is only considering the progress made in the implementation of projects, budget and special programmes which is reflected as part of the municipal strategic framework. The current SDF is still able to guide the council to make informed decisions around the distribution infrastructure development, economic opportunities, social upliftment and environmental conservation. It also provides a spatial reflection of infrastructural priority areas and development linkages within and outside the district. These spatial reflections are captured as development nodes and corridors of activities.

#### **Development Nod**es

This SDF provides the spatial dimension of economic trends and objectives, and on this basis it present a hierarchy of nodes consisting of a primary nodes, secondary nodes, tertiary nodes, rural service nodes and tourism and recreation nodes.

#### **Primary Nodes**

The Primary Nodes are proposed to be the urban centres of Kokstad, Umzimkulu, Ixopo and Underberg / Himeville as having potential high levels of economic development, growth and expansion. These proposed nodes serve the sub-regional economy of the district. There is however a need for these nodes to undertake detailed master-planning for infrastructural and services requirement for expansion. Typical services that are expected in these centres including Agri industrial development, large scale tourism projects, housing development, shopping centres, wide range of retail services, police services, primary, secondary and tertiary high level of education centres, hospitals, clinics, government departments, satellite offices (especially land affairs, social welfare.

#### **Secondary Nodes**

Secondary Nodes, these are the urban centres of Franklin, Creighton, Donnybrooke, Bulwer and Highflats which have potential for growth and good existing levels of economic development. Typical services that can be expected at these nodes can include police stations, low level retail services, low levels of housing development (less than 1000 lots), small scale tourism, education facilities (primary and secondary), clinics, pension payout points, community halls etc. Although Bulwer is categorized as Secondary Node, it is being treated as a primary node considering the potential posed by its strategic location once planned properly.

#### **Tertiary Nodes**

Tertiary Nodes, urban areas of Swartberg, Riverside, Ibisi and Rietvlei are tertiary nodes with lower potential for economic potential providing services mainly to the local comminities. Proper formalization in terms of planning and development control is required in these areas to enhance their development potential. Typical services to be expected in these centres can include low level retail services, police stations, education (primary and secondary), clinics, pension payout points, community halls and taxi ranks.

#### **Rural Nodes**

Rural Service Nodes represent the lowest order of locality, where a range of service and economic activities could be concentrated in a sustainable way. These are the most accessible locations within an acceptable distance of communities.

The level of service that are normally found at these nodes are:

- (i) Clinic / Mobile Service
- (ii) Post Boxes
- (iii) Shops
- (iv) Secondary and Primary School
- (v) Weekly Service
- (vi) Weekly / Mobile Service
- (vii) Pension Payout Point
- (viii) Taxi Rank; and
- (ix) Traditional Authority Court

These were identified in Ntsikeni, Lourdes, Gowan Lea, Centacow, Kilmon, Ncwadi, Stepmore, Ntwasahlobo, Makhoba, Nokweja and Jolivete

# Tourism and Recreation Nodes

Tourism and Recreation Nodes: These nodes comprising Garden Castle, Sani Pass and Bushman's Nek are located within areas which are attractive, provide good views, a feeling of "being in the mountains" and have potential for resource orientated activities. These have ready access to the wilderness / natural areas through controlled points". All these nodes are on private land, adjacent to the UDP, and are accessible to the public entry points leading to the Park.

In Kokstad urban fringe on the N2, Ntsikeni Nature Reserve, Nazareth, Ophepheni (P68), Indlovu Clan (Ubuhlebezwe to west of R56) Qunu falls, Umzimkulu and Creighton have potential for tourism development.

Greater diversity of tourism in the district could be achieved through wider range of facilities and attractions including historical (eg. Mission tourism), cultural events and eco tourism adventures (Avi tourism, River rafting (in Umzimkulu, Ngwagwane, Pholela, Ndawane Rivers) 4 X 4 trail, Mountain biking trails (berg to Coast) etc.

### **Development Corridors**

The corridors suggested in this SDF are based on the recommendations in the PSEDS, the various development informants identified in the earlier phase of the study and the goals and objectives of the SDF, with specific reference to the need to integrate district space and link the various nodes and opportunities into a meaningful whole; improve or extend access to areas with economic potential within areas of high poverty; maximise interest opportunities and potentials within the district in way which promotes growth and investment, and ensure the sustained growth of existing centres and corridors of economic development.

### **Provincial Priority Corridors (SC2 and SC6)**

| SC 2: | Kokstad – Umzimkulu – Msunduzi (Secondary Corridor), and  |
|-------|---|
| JC 2. | Kokstudi offizirinkulu Misunduzi (Secondury Connuor), unu |

**SC6:** Port Shepstone – St Faiths – Ixopo (Secondary Corridor)

Notwithstanding the classification of these corridors as secondary in terms of the PSEDS, it must be emphasised that for the district these are the main focal corridors. The definition and purpose of these corridors are described in the PSEDS as "a corridor serving areas of high poverty levels with good economic development potential within one or two sectors."

Although it could be argued that the primary function of these corridors is long distance traffic movement, development should be encouraged at appropriate locations along the corridors. More detailed planning at these locations will however be required as part of the local SDF's.

#### **Primary Corridors:**

The rationale for these corridors is provided by the PSEDS, and although their primary function is long distance traffic movement, development should be encouraged at appropriate locations along the corridors. More detailed planning will be required as part of the local SDF's. The proposed primary corridors are detailed in the main SDF document.

#### **Secondary Corridors:**

These corridors link nodes inside the District, and also provide linkages with external nodes. The proposed secondary corridors are detailed in the main SDF document.

It must be emphasized that the identification of corridors does not imply that development should be allowed to occur on an ad-hoc basis along the length of such a corridor. As part of the local SDF's, more detailed planning of the corridors will be required.

# 1.5 Broad Land Use

The greater part of the land within the SDM is covered by commercial agricultural land (grazing, crop farming and sugar cane) planation, and natural vegetation and traditional human settlement areas. Map ...... reflects the broad land use at a District level.

# 1.7 Land Reform

The protection of productive agricultural land from unplanned residential / urban development is essential to maintain the future productivity and efficiency of rural farming communities. Good quality agricultural land is a finite resource that must be protected and managed for the long term.

As a general scale plans should aim at protecting productive agricultural land from development that leads to its diminished productivity.

Residential development should be planned with a view to abide by these principles in the spirit of integrated and sustainable development as these will be a need to develop land for this purpose.

# Loss of land with agricultural potential in poor rural areas

The survival of South Africa's rural communities and the health of the rural economy depends upon the condition and availability of natural resources. The traditional and widespread view that land is almost a limitless resource is a myth.

Over-crowding, poverty and poor farming methods amongst other reasons have led to loss of significant areas of good agricultural and land degradation is now widely regarded as one of the greatest challenges facing rural areas.

### Land reform resulting in a loss of productive commercial agriculture

- Land reform encompasses three distinct components which are restitution, tenure reform, and the redistribution programmes. Land reform should not necessarily equate in a loss of products agricultural land.
- The Land Redistribution for Agricultural Development sub –programme (LRAD) amongst others recognises the need to provide grants for agricultural projects. Amongst the types of projects that can be catered for include: Food safety nets, equity schemes, production for markets.

With respect to agriculture in communal areas it is evident that many people already have secure access to agricultural land but may not have the means to make productive use of that land: LRAD assists in the process of minimising the loss of good potential agricultural land by providing schemes to make productive investments in communal land such as infrastructure or land improvements through the Department of Land Affairs.

# **1.8 Land Capabilities**

#### **1.9 Environmental Analysis**

#### 1.9.1 Description of habitats and vegetation communities

The Sisonke District contains a variety of different vegetation types and distributions (Figure 12), grouped into five biomes, namely, Forest, Grassland, Savanna and Azonal Vegetation (Table 1). These biomes provide the basic template for defining the extent of species-specific habitat that potentially supports a wide variety of biodiversity.

The Savanna biome is categorized as being Endangered and Critically Endangered; The Forest biome in the District is Near Threatened; the Grassland biomes are Near Threatened with the Midlands Mistbelt Grassland being Critically Endangered and the Southern KwaZulu Natal Moist Grassland having an Endangered status.

#### Savannah

Pockets of savannah occur throughout the drier north-western areas of the Midlands. These grasslands are characterized by patches of woodland, consisting mainly of tall "thatch (*Themeda triandra*, *Hyparrhenia .sp, Cymbopogon.sp*)grass" with Paperbark Acacia (*Acacia sieberiana*) as the dominant tree.

#### The Natal Mistbelt

Ngongoni Veld, also known as Natal Misbelt includes grasslands and forests. Although originally high in both speciesrichness and plant-endeminism, tragically very little is conserved, or in its natural state. The Blue Swallow is typically a Mistbelt grassland species.

#### **IUCN Red List of Threatened Species**

The **IUCN Red List of Threatened Species** (also known as the **IUCN Red List** or **Red Data List**) is the world's most comprehensive inventory of the global conservation status of plant and animal species. The International Union for Conservation of Nature (IUCN) is the world's main authority on the conservation status of species. The status of the all species is determined using the categories determined by IUCN ICUN categories:

Critically Endangered (CR) - species are considered to be facing an extremely high risk of extinction in the wild

Endangered (EN) - species considered to be facing a very high risk of extinction in the wild

Vulnerable (VU) - species considered to be facing a high risk of extinction in the wild

**Near Threatened (NT)** – species do not qualify for the threatened category but is close to be classified under one of the categories in the near future

**Data Deficient (DD)** - the data are inadequate to determine the degree of threat faced by a taxon to determine the appropriate listing

### Flora

The Sisonke District is known to support a number of Red Data species, including Critically Endangered, Endangered, Vulnerable and Near Threatened. A detailed list of Red Data plant species provided in Appendix 1.

### Fauna

In terms of Red Data fauna, there are Critically Endangered, Endangered, Vulnerable, Near Threatened, Data Deficient and Rare species are found within Sisonke District Municipality. A detailed list of Red Data fauna is provided in

# Appendix 2

# Figure 1: Vegetation types of the Sisonke District Municipality

### 1.9.2 Hydrology

The rivers of KZN are fed by water from the Drakensberg, the highlands of the Free State and the grasslands further north. Much of the river water in KZN is used for irrigation and storage dams, which supply local needs as well as those of the industrial heartland of Gauteng, The Mkomazi River has its source at an elevation of approximately 3000 m above sea level in the Drakensberg Mountains. The river flows in a south-easterly direction and enters the Indian Ocean near the town of Umkomaas about 40 km south of Durban. Several large tributaries, including the Loteni, Nzinga, Mkomazane, Elands and Xobho rivers flow into the Mkomazi River. The region includes the small towns of Bulwer, Impendle, Ixopo, Mkomazi, Craigieburn and Magabheni which have small water requirements. The main land use activities in the catchment are large industry (Sappi Saiccor) located at the mouth of the catchment, irrigation and afforestation. The Ngwagwane catchment in the Sisonke district municipality is important from a conservation point of view, due to the abundance of important natural forest and wetland areas. (Camp, 1999).

# Geohydrology

The Dwyka Tillite formation has the smallest coverage in comparison to the other lithological units in the catchment. It occurs just south of Richmond where it lies exposed in the river banks of the Mkomazi. The Ecca Group is represented by the mudstones/shale of the Pietermaritzburg, Vryheid and Volksrust Formation. The foothills of the Drakensberg Mountains at the head of the Mkhomazi River and the central areas of the catchment are dominated by these lithologies. These lithologies support marginal to poor borehole yields. However the presence of extensive intrusive dolerite in the form of sheets and dykes has greatly enhanced the potential of the mudstones to store and yield groundwater.

Figure 2: Hydrology map of the Sisonke District Municipality

Figure 3: Rivers within the Sisonke District Municipality

Figure 4: Wetlands of the Sisonke District Municipality

# 1.9.3 Protected areas and other conservation areas

A Protected Area is defined as any area declared or proclaimed as such in terms of section or listed in the Second Schedule to the KwaZulu-Natal Nature Conservation Management Act No. 9 of 1997; or any of the protected areas referred to in section 9 of the National Environmental Management: Protected Areas Act No. 57 of 2003.

### **EKZNW's Provincial Biodiversity Plan**

The Provincial Biodiversity Conservation Plan (also known as the C-Plan forms the core focus of EKZNW's activities, identifying the provinces' to the national and International conservation portfolio. The Biodiversity Conservation Plan is the underlying plan for all the other types of conservation Plans in the province (such as Bioregional Plans for the districts, PA Expansion Plan, Stewardship Plans, and so on). It contains all the most up-to-date information regarding the terrestrial, coastal and aquatic environments, natural resources, species and transformation, and combines this spatially to produce the most effective and efficient plan to conserve a functional and representative sample of biodiversity in KZN.

Figure 5: MinSet within Sisonke District Municipality

Figure 6: Conservation Plan within Sisonke District Municipality

#### Figure 7: Protected areas within the Sisonke District (including Stewardship site see box 5 for more information)

# **Protected Area Expansion Strategy**

EKZNW is required to establish a representative network of protected areas in KwaZulu Natal, In order to meet our national and provincial, as well as international conservation obligations and mandates. However, biodiversity outside protected

areas urgently also needs to be conserved as much as biodiversity is being lost due to rapid rate of land transformation and development. The current network of protected areas falls well short of achieving both representation of landscapes ecosystem as well as species and habitat viability. Added to this is the necessity of rescuing those species listed as critically endangered as well as endangered, which occur in KwaZulu Natal.

 Protected Areas Expansion Plan identifies areas in the province that have priority biodiversity which needs to be secured so that biodiversity essential to securing the provincial targets is not lost or destroyed. This network would include protecting areas and securing viable populations on state, private and communally owned land that are representative of the province's biodiversity, thus preventing extinctions (EKZNW Managing our Biodiversity Brochure)

# 1.9.5 Climate and Climate Change

The climate of Sisonke is influenced by the cool Drakensberg Mountains to the west. Temperatures vary with altitude, so in KZN we have a range from warm and humid conditions at sea level, contrasting with very hot and often dry in the bushveld, to very cold at 2000-3000 m above sea level in the Drakensberg. The highest rainfall areas are in the Drakensburg, in winter, spring and early summer most of the rain is caused by cold fronts, moving in from the south-west. These are often preceded by hot, desiccating, dry "Berg" winds from the north and north-west.

Snowfalls are common mainly in the Drakensberg, where snow usually melts within a few days, though heavy snowfalls can blanket the summit for weeks. Many species of plants are adapted to the harsh conditions, and thrive in areas prone to frost and snow.

During the 2012/13 finatial year, the SDM budgeted for the preparation of a detailed Climate Response Strategy in order to establish local impact of climate change. Due to limited funding the SDM was not able to make any appointments in this regard. However, the SDM has maped out the areas that are considerd to prone to flood and any other climate change impact.

Figure 8: Annual Rainfall for the Sisonke District

Figure 9: Climate Change/Disaster Prone Areas

#### **1.9.6 Strategic Environmental Assessment**

The SDM is currently preparing the Strategic Environmental Assessment which is also the requirement of the Municipal Systems Act for the preparation of Spatial Development Framework. This SEA will assist the municipality together with the BSP in assessing development proposal and serve as guide to inform development priorities. The SDM is also willing to prepare the Environmental Management Framework (EMF) which is the more recognized environmental management tool.

# **1.12 DISASTER MANAGEMENT**

# SOCIAL SERVICES

The Social, Economic and Development Planning Department is responsible for the following programs:

- Disaster Management
- Municipal Health Service

In each and every fiscal year projects are identified in each program for implementation, to ensure that development takes place and that required basic services are undertaken, as part of uplifting the socio-economic status of the community of Sisonke.

#### DISASTER MANAGEMENT

The Disaster Management Act (Act 57 of 2002), clearly outlines initiatives that must be undertaken to make sure that organisation's of states comply with the act and the policy framework on disaster risk management accordingly.

The area of jurisdiction of Sisonke District Municipality is prone to different types of disaster risks both natural and human induced. It is of essence therefore to understand that, natural disasters cannot be prevented but the least that, the municipality can do is develop strategies to mitigate the effectives of such natural disasters.

On the other hand human induced disasters can be prevented by making sure that, continuous sharing of information with the community takes place at all times.

The Sisonke District Municipality shall endeavor to ensure compliance with the above statutory documents for the purposes of creating a safe environment for its residence as enshrined in the constitution of South Africa.

#### Objectives

In the next five years, the Sisonke District Municipality, will strive to create an environment that will promote continuous and integrated multi-sectoral, multi-disciplinary processes of planning and implementation of measures aimed at:

- Preventing or reducing the risk of disasters within the district.
- Mitigating the severity or consequences of disasters.
- Ensuring emergency preparedness at all times
- Ensuring a rapid and effective response to disasters and
- Ensuring post-disaster recovery and rehabilitation.

The following projects as enshrined in the Disaster Management Act (Act 57 of 2002) are very critical in ensuring compliance with the above act and thus ensuring the safety of the community of Sisonke.

#### INSTITUTIONAL CAPACITY

#### **Establishment of a Disaster Management Centre**

Section 43 subsection 1 of the Disaster Management Act (Act 57 of 2002) clearly obliges metropolitans and district municipalities to establish disaster management centers within their areas of jurisdiction and this is done subsequent to consultations with local municipalities within a particular district.

In complying with the above act, Sisonke District Municipality has commenced with the construction of the disaster management center in sub 5 of Lot 419 situated in Morningside Ixopo along R56 route from Pietermaritzburg to Kokstad, under uBuhlebezwe Local Municipality.

It is envisaged that, such construction will be completed by the year 2013 subject to additional funding being sourced. This is one of the most important projects that, the district municipality would like to see being realized in a short space of time in order to allow the disaster management section to operate efficiently.

The Disaster Management Unit currently sits at the Social, Economic and Development Planning Department within the municipality and the organogram is as follows:

#### Establishment of a Volunteers' unit

The Disaster Management Act (Act 57 of 2002), provides for metropolitans and district municipalities to establish units of volunteers whenever necessary or deemed fit in order for such volunteers to assist within the disaster management unit.

As part of Disaster Management Institutional Capacity the Sisonke District Municipality recruited about one hundred and fifty volunteers (150) to assist in the disaster management unit. A volunteer profile has been created and sent to the provincial disaster management center.

The most important aspect about the volunteer unit is to ensure that, the profile is updated on regular basis to be in a position to sustain the number of volunteers in the program.

The volunteer program has liabilities in terms of paying stipends, uniforms and training. The municipality has since trained its volunteers on a detailed disaster management program, basic fire- fighting and first aid to allow them to fit in the unit and be able to discharge their duties in a satisfactory manner.

The volunteers were issued with uniforms and certificates on the 16<sup>th</sup> February 2013 in an event that was held at UMzimkhulu College.

#### **RISK ASSESSMENT**

When the municipality reviewed its Disaster Management Plan, at the same time it undertook the process of risk assessment. Workshops in this regard were conducted to all five local municipalities targeting councilors and all relevant disaster management officials including those from government departments, private sector and non-governmental organizations.

#### Risk Profile

The 2012 Sisonke District Municipality's risk profile is as follows with reference to the 2008 risk profile:

# **RISKS REQUIRING RISK REDUCTION PLANS**

| 2008                | 2012                                     |
|---------------------|--|
| Fire                | Fire                                     |
| Floods              | Floods                                   |
| Hazardous Accidents | Poor Conditions of roads- Road Accidents |
| Snow                | Thunderstorms and Lightning              |

RISKS REQUIRING PREPAREDNESS PLANS

| 2008                                     | 2012   |
|--|--|
| Fire                                     | Fire   |
| Drought                                  | Drought  |
| Floods                                   | Floods   |
| Snow                                     | Thunderstorms and Lightning                      |
| Hazardous Material Accidents             | Poor Conditions of Roads- Road Accidents         |
| Tornadoes                                | Heavy Winds                                      |
| Diseases such as: HIV/ AIDS, TB, Cholera | Communicable Diseases Such as: HIV/AIDS, Cholera |

#### PRIORITY RISKS

| 2008   | 2012   |
|--|--|
| Fire   | Fire   |
| Floods   | Floods                                       |
| Severe Weather (Snow, Tornado)                               | Severe Weather (Thunderstorms and Lightning) |
| Hazardous Materials Incidents (Especially Road<br>Accidents) | Poor Conditions of Roads- Road accidents     |

# **RISK REDUCTION, PREVENTION AND MITIGATION**

Sisonke District Municipality utilizes the risk assessment profile and the disaster management plan to identify risk reduction projects to be included in the IDP for the purposes of prioritization and implementation thereof.

# **Risk Reduction Capacity**

The organizational structure for risk reduction within the municipality includes Sisonke Disaster Management, the Disaster Management Advisory Forum, the interdepartmental Disaster Management Committee and local municipalities within the district. Risk reduction projects teams and preparedness planning groups. The total structure of the municipality, with every member of personnel and every resource is also committed to disaster risk reduction. On-going capacity building programmes assures the availability of adequate capacity for risk reduction.

## Indigenous Knowledge and Community Participation

The Sisonke District Municipality's Disaster Management Framework currently being reviewed discusses the objectives and significance of including indigenous knowledge in disaster management. The local communities have well-developed traditional indigenous knowledge system for environmental change. Communities can easily identify with this knowledge as it facilitates their understanding of certain modern scientific concepts for environmental management including disaster prevention and mitigation.

Such indigenous methods discussed during the workshops relate mainly to thunderstorms and lightning.

| NAME OF PROJECT                          | PRIORITY | SOURCE OF FUNDING        |
|--|----------|--------------------------|
| Completion of Construction of Disaster   | High     | Internal and/or External |
| Management Center                        |          | (COGTA GRANTS)           |
| Upgrade and Maintenance of the DM        | High     | Internal                 |
| Information and Communication System     |          |                          |
| Procurement of Fire Beaters              | High     | Internal                 |
|  |          |                          |
| Disaster Management Awareness            | High     | Internal                 |
| Campaigns                                |          |                          |
| Convene Disaster Management Advisory     | High     | Internal                 |
| Forums                                   |          |                          |
| Effective Response to Disaster Incidents | High     | Internal                 |
| and/ or Disasters                        |          |                          |
| Installation of Lightning Conductors     | High     | Internal                 |
| Procurement of Disaster Management       | High     | Internal                 |
| Relief                                   |          |                          |
| Acquisition of Disaster Relief Material  | High     | Internal                 |
| Supply and Installation of Lightning     | High     | Internal                 |
| Conductors                               |          |                          |
| Conduct Emergency Exercises              | High     | Internal                 |

#### Summary of projects for the financial year 2013/2014

| Review of Emergency Exercises | High | Internal |
|-------------------------------|------|----------|
|-------------------------------|------|----------|

# **RESPONSE AND RECOVERY**

The municipality has developed disaster management preparedness and/ or response plans in terms of the relevant prioritized risks that are imminent within the jurisdiction of the municipality.

#### Preparedness Capacity for Sisonke District Municipality

As part of preparedness, the Sisonke District Municipality's Disaster Management, Disaster Management Advisory Forum, Local Municipalities within the district, Preparedness Planning Groups, Joint Response and Relief Management Teams, Disaster Management Volunteers, Rehabilitation & Recovery Project Teams and Sisonke Emergency Control Group are always on alert for action.

It is therefore very important to understand that, during response and recovery operations the relevant disaster preparedness and/ or response plans of the municipality will be executed by the disaster management structures.

As and when disaster incidents and/ or disasters occur, the response teams are immediately activated to assist those affected, conduct assessment and also provide disaster management relief.

Some of the response plans available as enshrined in the disaster management plan are as follows:

- Cholera Incident Response Plan
- Drought Incident Response Plan
- Fire Incident Response Plan
- Floods Incident Response Plan
- Hazardous Materials Accidents by road Response Plan
- Snow Incident Response Plan
- Tornados Incident Response Plan

#### Declaration of a State of a Disaster

The Disaster Management Act (Act 57 of 2002) provides for the declaration of a disaster and it is indicated therein that, there are three states of disasters namely:

- Local State of a Disaster
- Provincial State of a Disaster
- National State of a Disaster

Sisonke District Municipality has mechanisms in place i.e the disaster management advisory forum and through Joint Operations Centers and in consultation with local municipalities within the district to ensure that, whenever necessary the Council represented by the Mayor can declare a local state of a disaster by notice through the provincial gazette. Where the local state of a disaster proves to be more than the resources available to deal with it, the municipality reports the matter to the provincial disaster management center to assist. The same applies to the provincial disaster management center to national.

#### TRAINING AND AWARENESS

Disaster Management training and awareness is taken very seriously by the municipality since it has been proven that, people who are aware of disasters register less mortality rate as compared to those that have no knowledge of disaster management.

The Disaster Management Act (Act 57 of 2002) emphasizes the issue of capacity building on disaster management. The municipality conducts at least 12 awareness campaigns annually in terms of its service delivery budgetary implementation plan. In some instances the municipality partner with the provincial disaster management center in conducting such awareness campaigns.

The target groups are:

- Community
- Schools

Disaster Management Volunteers are also trained accordingly by the municipality to ensure that, they discharge their duties in a very diligent manner.

The Disaster Management Awareness Campaigns conducted by the municipality are in collaboration with municipal health services in terms of providing health and hygiene awareness campaigns.

In line with section 47 subsection 2 of the Disaster Management Act (Act 57 of 2002), the municipality has a program on disaster management awareness that ensures that, encourage risk avoidance behaviors within the community whilst on the other hand increasing capacity on information sharing.

Schools and communities are the main targets. Once a year a provincial disaster management awareness campaign is held which brings together broader communities within the area of jurisdiction. It is a known fact that, where communities understand what to do in case of a disaster, the extent of mortalities becomes minimal as compared to a community that does not have disaster management information at all. The municipality conducts its disaster management awareness campaigns on monthly basis as is required in terms of the Service Delivery Budgetary Implementation Plan. Due to the importance of this program the municipality has to continue to fund it each and every year for the purposes of taking information to the public.

# FUNDING ARRANGEMENTS

The municipality is currently funding its Disaster Management Projects with internal budget. This include amongst other things the:

- Disaster Management Center
- All risk reduction projects
  - Installation of lightning conductors
  - Disaster Management Awareness Campaigns
  - Forum meetings
  - Procurement of Disaster Management Information and Communication System
  - Procurement of Disaster Relief e.t.c.

It is of outmost importance to indicate that, COGTA is also co-funding the construction of the Disaster Management Center where-in an amount of R 2,500, 000.00 was provided to the municipality. This amount has been utilized altogether towards the project.

The municipality has once again submitted a business plan to COGTA, to once again assist with funding to complete the Disaster Management Center. Other avenues to source more funding for the center are also being pursued e.g MIG.

# SWOT ANALYSIS

| STREANGHTS  | WEAKNESSES   |
|---|--|
| 1. Disaster Management Volunteers Unit  | 1. Inadequate personnel (Municipal Health Services)    |
| 2. Improved coordination during disasters   |  |
|   |  |
| OPPORTUNITIES   | THREATS  |
| <ol> <li>Good working relations between the<br/>District, LMs and other stakeholders</li> </ol> | 1. Unexpected disasters that far exceeds our readiness |

# 1. Demographic Analysis

This section looks at overall District demographic makeup. The population projection were worked on two growth scenarios in line with generic growth parameters being applied across the country as well as taking into cognizance the effect of AIDS in population growth.

# **Demographic Profile**

The KwaZulu-Natal Province has a growing and maturing population, presenting opportunities and challenges to the province. On average between 2002 and 2011, the KwaZulu Natal population was estimated at just over 10 million people. The largest number of these people lived in eThekwini Metro (32.8 percent of the provincial population), followed by uMgungundlovu (9.5 percent), and uThungulu district (9.4 percent). Sisonke contributed 4.8 percent to the provincial population, the district with the lowest population number.

# The total population of Sisonke is 461 41

9 the District has 5 Local Municipalities, Ingwe, KwaSani, Greater Kokstad, UMzimkhulu and UBuhlebezwe.

| Municipality                       | Population size |  |
|------------------------------------|-----------------|--|
| KwaSani Local Municipality         | 12 898          |  |
| Ingwe Local Municipality           | 100 548         |  |
| UBuhlebezwe Local Municipality     | 101 691         |  |
| Umzimkhulu Local Municipality      | 180 302         |  |
| Greater Kokstad Local Municipality | 65 981          |  |
| Sisonke District Municipality      | 461 419         |  |

#### **Population Distribution per Local Municipality**

Stats SA 2011

The rural settlements are spatially disintegrated and mono-functional in nature. The District Municipality has prepared a Spatial Development Framework which aims at integrating rural settlements to the regional economy. The Spatial Development Framework outlines hierarchy of nodes in terms of primary, secondary, tertiary nodes and hubs. The above figure indicates that UMzimkhulu, Ingwe and Ubuhlebezwe Local Municipalities are the most populated respectively, within the District. Greater Kokstad is the fourth populated after the mentioned three local municipalities followed by KwaSani.

| Municipality                          | Black  | Coloured | Indian or Asian | White | Total  |
|---------------------------------------|--------|----------|-----------------|-------|--------|
| KwaSani Local<br>Municipality         |        |          | 51              | 1350  | 12898  |
| Ingwe Local<br>Municipality           | 99283  | 242      | 113             | 797   | 100548 |
| Ubuhlebezwe<br>Local Municipality     | 99188  | 1172     | 385             | 831   | 101691 |
| Umzimkhulu Local<br>Municipality      | 179104 | 620      | 224             | 184   | 180302 |
| Greater Kokstad<br>Local Municipality | 57498  | 5402     | 733             | 2194  | 65981  |
| SISONKE DISTRICT<br>MUNICIPALITY      | 446408 | 7546     | 1506            | 5356  | 461419 |

#### **Population Distribution by race**

#### Stats SA 2011

The above figure reflects the Black African dominance across all the Municipalities. This is an indication or confirmation of the racial demographics across the District. One notices the second dominant group of Whites across the entire district except in Greater Kokstad where the Coloured population is the second dominant within the Municipality. The rural nature of the District and the dominance of Black Africans may indicate the plight of all rural communities that are characterised by huge service backlogs, abject poverty, unemployment and other social development challenges. The implementation plan in Section E 2 attempts to deal with these challenges at length.

#### **Sisonke Gender Distribution**

| Municipality                   | Males   | Females |
|--------------------------------|---------|---------|
| KwaSani Local Municipality     | 6 688   | 6 219   |
| Ingwe Local Municipality       | 46 752  | 53 795  |
| Ubuhlebezwe Local Municipality | 47 246  | 54 445  |
| Umzimkhulu Local Municipality  | 81 749  | 98 553  |
| Greater Kokstad Municipality   | 32 032  | 33 950  |
| SISONKE DISTRICT MUNICIPALITY  | 214 466 | 246 953 |

# Stats SA 2011

The table above reflects the Gender distribution in the District. This therefore assists the government at all levels to focus investment especially to vulnerable groups like women. The gender figures also help the government to provide appropriate facilities and social investments in line with gender demographics. Other programs can be seen in our Strategic Matrix in section D of this document. As highlighted in the table above, municipality does have programme in place that are addressing gender issues and have a gender focal person for the structure to be more functional within the DM.

## Age Distribution at Sisonke District Municipality

The age distribution in a society is also a determinant for the government institutions to supply appropriate social investments for the relevant age groupings. The above table indicates the age distribution of the population within Sisonke District:

At a district level the age group between 15 to 34 years, which is categorized as youth, is the most dominant and in almost all the local municipalities. This is the same group that forms part of the active labour group, which is also sexually active. This is the most vulnerable group to the social ills including unemployment, prone to HIV/ Aids and other infections, involvement in crime and drugs etc. Improper handling of this group may result to negative social challenges. The huge numbers of this age group call for a need for creation of employment opportunities, provision of educational facilities to cater for their needs. Failure to do so will result to a huge influx of youthful members of Sisonke to other major towns for better employment (brain-drain) and education opportunities. As a district we have put money aside to assist this group of our population. The senior citizens record the lowest number across all municipalities. The middle age (35 to 64) is the third in dominance of the Sisonke population.

# Percentage distribution of the population in five-year age group by sex, South Africa, Census 2011

Stats SA 2011

The population pyramid above for Sisonke District indicates that the district is youthful in nature. There is a broad base made up of 0-4 population group, the municipality in its planning will closely work with the Department of Education and the Department of Social Development to ensure that sufficient services are provided to this particular group, linking or introducing the group to Early Childhood Development.

# Primary Education between the ages of 6-13

| District/Local Municipality        | 2001  | 2011  |
|------------------------------------|-------|-------|
| Ingwe Local Municipality           | 90.4% | 89.5% |
| KwaSani Local Municipality         | 90.0% | 74.1% |
| Greater Kokstad Local Municipality | 85.1% | 90.1% |
| Ubuhlebezwe Local Municipality     | 87.4% | 89.8% |
| Umzimkhulu Local Municipality      | 90.9% | 93.9% |
| Sisonke District Municipality      | 89.5% | 91.2% |

# Stats SA 2011

Clearly from the tables above it is apparent that there has been a positive growth of literacy levels with Sisonke District municipality over the past ten years. In 2001 89.5% people that were able to read and right but in 2011 the percentage increased to 91%. This is a major paradigm shift when considering that only 9.7% is illiterate.

#### Stats SA 2011

The bar graph above show a significant shift from 23.6% in 2001 to 9.7% in 2011 in the percentage of population that is above the ages of 20 with no education. This is a clear sign that more and more young people are getting educated. This becomes a challenge for district if there are limited places of work that will employ this generation. The district has since embarked on a journey to sensitise the business people on investment opportunities that the district offers. A development Summit will be held in April 2013. It hoped that this Development Summit will trigger investment opportunities which will in turn boost employment and fight poverty and inequality.

# Stats SA 2011

# Unemployment rate by Local Municipalities in Sisonke District

#### Stats SA 2011

Unemployment in Sisonke is higher by 3% from that of the Province. This is an indication that more work still needs to be done in terms of working together will private businesses to create employment, but of critical importance to create a conducive environment where business flourish. More money over the next five years has been invested to infrastructure development as one critical factor that will boost economic development in the district.

Unemployment rate by Local Municipalities in Sisonke District Youth (15-34)

# Stats SA 2011

From the bar graph above it is clear that youth unemployment is still far above that of National. Umzimkhulu, Ingwe and UBuhlebezwe local municipalities are the critical municipalities when it comes to youth unemployment. Working together with relevant stakeholders the municipality will ensure that this trend is reversed. Sisonke District Municipality has since developed programs in the 2013-2014 financial year, as reflected in the Section E 2 in the implementation plan that will assist youth with skills and create job opportunities.

# Labour Force

| Sisonke District Municipality         | 43294                      | 10891                        | 6337                 | 2704           | -           | 398193            |
| Ingwe Local Municipality              | 6333                       | 2406                         | 1286                 | 798            | -           | 89724             |
| Kwa Sani Local Municipality           | 3437                       | 713                          | 539                  | 741            | -           | 7467              |
| Greater Kokstad Local<br>Municipality | 13589                      | 2730                         | 2503                 | 314            | -           | 46845             |
| Ubuhlebezwe Local Municipality        | 9180                       | 2441                         | 786                  | 428            | -           | 88855             |
| Umzimkhulu Local Municipality         | 10754                      | 2601                         | 1223                 | 422            | -           | 165301            |

#### Stats SA 2011

The labour force table above reveals that out of over 460 000 population that resides in Sisonke just under 70 000 is employed by either formally or informally. And the majority of those that are unemployed as depicted in the graphs above is the youth between the ages of 15 and 34. This indeed is a worrying factor for the District, but as mentioned in the paragraphs above the District has embarked on a number of programs to assist in this situation, from offering bursaries to needy students to go study at various institutions and has encouraged learners to pay more attention on rare skills like engineering and recently in 2013 a significant number of medical students have been sent to Cuba to study medicine. Most of the youth programs are reflected in the Implementation Plan which is E 2 of this document.

Monthly income levels amongst the population (age 15-65)

#### Stats SA 2011

The income inequality can be observed if an income distribution is considered. The figure above depicts the distribution of employed residents across monthly income categories using the 2011 Census. It is evident that of those employed; most workers earn low levels of remuneration. Nearly 80% of Sisonke District workers earn R1,600 per month or less while 40% earn R800 or less. In stark contrast, very few workers earn R122,800 per month or more – less than 2%.

Given the above, it is not surprising that the Sisonke District Municipality is home to a significant number of residents who could be classified as living in poverty. In 2011, almost 350,000 residents could be classified as "poor".

Source: Global Insight MetaData 2011

The dominant role played by agriculture in the district economy is evident. Agricultural activities within the Sisonke District Municipality are crop farming (i.e. potatoes and cabbages) and dairy farming. The agriculture sector is indeed one of the main sectors in the region contributing to the regional economy. There are also commercial forestry plantations that provide raw materials for wood-related products. Other suitable agricultural activities that have potential for growth in the region are carrots, maize, oats, soybeans, tomatoes, wheat, sorghum, sunflower and livestock. The agricultural sector in the Sisonke District Municipality has been one of the largest sectors of the district economy. Unfortunately, the sector is failing to fulfil its potential.

A trend analysis allows a greater appreciation of the make-up of the Sisonke District Municipality economy, particularly in light of the recent economic recession. The growing capacity of the public sector in the district can be clearly charted, with GVA of community services increasing from R 365 million in 1996 to R 1.513 billion in 2010 (an increase of over 400 %). Analysts estimated that community services will continue this rate of growth over the next four years, reaching R2.539 billion in 2015 (an increase of 168 %). In that year, community services are projected to make up almost 39 % of the district's GVA. Agriculture, in contrast, has grown in a more haphazard and slow fashion, buffeted by the often abrupt variations of national and international markets. Indeed, it is clearly evident that agricultural GVA in the district has declined in real terms between 2007 and 2010, no doubt in part caused by the recent financial recession. The Sisonke District Municipality is located outside the major manufacturing sectors of the KwaZulu Natal economy, and therefore it is unsurprising that manufacturing in the district has remained weak and effectively stagnant, showing only slow signs of growth and appreciation since 1996.

Looking into the future, growth in the agricultural sector is predicted to be relatively stagnant at 1.6 % on average for the period 2010-2015. Unfortunately, there are constraints inherent to certain economic sectors that hamper potential economic growth. For example, no matter how one might expect agriculture to expand, a completely unforeseen dry spell over a few years can have a detrimental effect. Growth in the manufacturing sector is predicted to be relatively stagnant at 2.5 % on average for the period 2010-2015

| Umzimkhulu    | 375               | 79                | 442                                    | 33                                  | 289         | 88                        |

#### Crime

The table above indicates that common assault, burglary at residential premises and stock theft are a three measure crime activities in the District. This is a call to all the stakeholders to critically analyze these findings and come up with remedial

interventions to address the situation. The district municipalities will have to work closely with SAPS and its sister municipalities to combat the scourge of crime in the district.

# 3. Municipal Transformation and Organisational Development Analysis

- 1. Municipal Transformation
- 3.2 Organisational Development

# 3.2.1 Institutional Arrangement

# **Institutional Structures**

The institutional structure of the Sisonke District Municipality is divided into two sections, namely **administrative** and **political structure**. The administrative structure is responsible for implementation of the Councils policies and is accountable to the political structure.

# **Political Structure**

The centre of the Sisonke District Municipalities political structure is Council, which operates through a number of committees. The most dominant of these committees is the Executive Committee (EXCO) that assists the Council in carrying out its political responsibilities and mandates. A list of the standing Committees is listed below;

- Finance and Corporate Services Committee
- Infrastructure Services Committee
- Social Services Committee
- Water and Sanitation Services Committee

# **Political Structure Composition**

| COUNCIL COMPOSITION              | COUNCILLORS |
|----------------------------------|-------------|
| Mayor                            |             |
|                                  | 1           |
| Speaker                          |             |
|                                  | 1           |
| Deputy Mayor                     |             |
|                                  | 1           |
| EXCO Members                     |             |
|                                  | 3           |
| Directly Elected Representatives |             |
|                                  | 11          |
| Other Councillors                |             |
|                                  | 15          |
|                                  | 26          |

# Administrative Structure

The center of the Sisonke District Municipality's administration structure is the Municipal Manager (The accounting officer), who administers the institution with departments and various units reporting directly to him.

This administration structure is comprised of 5 departments. These are,

- Corporate Services
- Finance Services
- Social, Economic and Development Planning
- Water Services
- Infrastructure Services.

# 3.2.2 Powers and Functions

- Portable Water
- Sanitation
- Local Economic Development
- Environmental Health
- Bulk Electricity

# 3.2.3 Organisational Structure

# 3.2.4 Municipal Institutional Capacity and Status of critical posts

Sisonke District Municipality has filled all its critical posts, however the post of the Municipal Manager has not yet been filled. The post was advertised in January 2013 after the contract of the former Municipal Manager came to an end in December 2012.

The total vacancy rate in the municipality is as follows:

- Total number of staff 332
- Vacant posts (funded) 24
- Frozen posts (unfunded) 497
- Total in structure 853

#### HUMAN RESOURCE STRATEGY / PLAN

As the Sisonke District Municipality aims to consolidate the solid gains of the last five years and offer better quality services and performance such as exemplary political and administrative governance, it is crucial to build human resource capital to support the needs of the five year IDP.

The Sisonke District Municipality is in the process of developing the Human Resource Strategy / Plan, which aims to ensure that an organization has the right number of people, the right kind of the people, in the right places, at the right time doing things that are economically most useful for the municipality. The Human Resource Strategy / Plan also deals with demands such as those posed by the implementation of the Skills Development Act, other labour legislation including programmes and policies related to the HIV/AIDS pandemic.

#### Key challenges identified include the following:

- Slow finalization of the Job Evaluation process by SALGA.
- High rate of absenteeism enterprise-wide, particularly in satellite offices.
- Cascading of the Performance Management to levels just below s56 & 57.
- Ensuring sound and effective labour relations.
- Development of Personal Development Plans (career pathing).
- Development of ICT strategies and policies.
- No retention and scarce skills policy.
- Insufficient budget for filling of positions and other HR projects.
- Inadequate office accommodation or space.
- There are no career paths and succession plans in place.

#### **Staffing and Remuneration**

The Job Evaluation process is being finalized but is moving at a snail's pace. It seeks to address all staffing, grading and remuneration matters in the municipality.

#### 3.2.5 Human Resource Development

Successful human resources are often the difference between success and failure. The Sisonke District Municipality was faced with specific problems after the Disintegration from Indlovu District Municipality. The transformation demanded that the municipality respond with transformation agents, policy makers and innovative thinkers who could assist the municipality deal with financial sustainability, basic service delivery, integration of historically disadvantage and divided communities, backlogs and addressing the basics – such as grass cutting, traffic management and public lighting. As the Sisonke District Municipality aims to consolidate the solid gains of the last five years, and offer better quality services and performance such as exemplary political and administrative governance, it is crucial to build human resource capital to support the needs of the five year IDP.

# **Staffing and Remuneration**

The job evaluation process which is still on hold is seeking to address all staffing, grading and remuneration matters in the municipality. However, the municipality embarked on a process of developing its remuneration policy.

# **Succession Planning**

Due to the realization that in some specific categories, specialized staff can be easily attracted by the private sector for their skills, therefore the municipality has decided that it is critical to develop a succession and carrier management plans in 2013/2014 financial year.

Succession planning will be characterized by an aggressive career-pathing, where staff would be continuously alerted of the opportunities for growth in the municipality.

Succession planning also would aim to create conditions where the departure of leadership does not signal collapse in organizational leadership.

Every leadership level should be immediately replaceable internally, through a properly managed succession planning process.

# **Skills Development and Training**

The SDM has developed a program to address the skills and competency needs of staff. New challenges demand the staff perform optimally to meet the identified needs.

Changes also impact on processes, necessitating rapid adjustment by the departments. In the 2012 council Term, the municipality aims to invigorate the progress around skills development driven by the program priorities rather than the compliance requirements of the Skills Development Act. Skills development programs will be aggressively undertaken by the municipality to ensure that staff already in the employ of the SDM are ready for deployment to new responsibilities and / or added demands to their existing functions.

The Sisonke District Municipality recognizes the importance of investing in its human capital through carefully planned skills development initiatives and activities. It is succeeding in creating a learning organization by placing significant value on the education, training and development of its workforce, and by encouraging employees to take advantage of appropriate opportunities aimed at advancing their skills and competency levels.

The SDM has established partnerships with higher education institutions, e.g. UNISA Wits, and other role players to ensure that its strategic skills and competency needs are addressed through relevant and customized skills development interventions. Skills development is also seen as a vehicle that would facilitate and enhance achievement of the SDM Employment Equity agenda. Although skills development is aimed at benefiting all employees, it has to make significant progress in advancing the development interests of the designated groups (black women, and the disabled), in line with the SDM Employment Equity targets.

An intensive skills audit is conducted annually to identify the SDM strategic and operational skills needs. A Workplace Skills plan has been developed and implemented to address skills needs.

Skills development is linked to other human resource processes and provides valuable information for recruitment and, and promotion processes.

The SDM also provides a subsidized education scheme, assisting all permanent employees who wish to pursue part-time studies towards formal tertiary qualifications.

The SDM is complying with the skills development legislation and pays a monthly skills levy of 1% of its salary bill to the South African Revenue Service, in line with the provisions of the Skills Development Levies Act. Part of this money is claimed back in the form of grants from the Local Government and Sector Education and Training Authority (LGSETA), on compliance with applicable grant disbursement criteria.

# The SDM has submitted its Workplace Skills Plan the Annual Training Report to the authority.

A Skills Audit was conducted during the 2011 / 12 period with the main purpose being to gather information of qualifications and levels of skills of SDM employees, compare job requirements to those of incumbents, verify employee qualifications, and identify employees' development need and to update employee records.

# The Skills Audit revealed the following:

- Skills mismatches, where employees had qualifications which were not a requirement or relevant for their current job.
- Employees, where employees are in a possession of a lower level qualification.
- Unqualified employees, where employees occupies a position for which they do not meet the minimum or basic academic, skill and competency requirements.
- Appropriately qualified employees: Employees meet job requirements adequately
- Employees who do not possess formal academic qualifications but have managed to develop and acquire the required skills and competence through workplace exposure and development experience.
- No formal academic qualification and limited education: In these cases, employees had little or no access to appropriate educational and developmental opportunities.
- The SDM is considering a number of interventions to address skills mismatches and to facilitate and support optimal utilization of SDM human capital.
- These include but are not limited to up skilling, reskilling, mentoring and coaching, redeployment, recognition of prior learning, on-the-job training and development as well as ongoing professional development.

• R37, 000.00 mandatory grant received from the LGSETA. The SDM will have to resolve that each department should spend 1% of its total budget on training and development, in an attempt to ensure that employees are trained appropriately and a learning organization is created.

Over R400 000 was spent on training resulting in a ratio of 92% expenditure on training in relation to the total salary bill, which is above the set target of 1%. The SDM further spent R360 000 for experiential learning programs in the 2012/13 financial year, five interns and 8 (eight) experiential learners.

# ABET Training

In order to eradicate illiteracy, a program needs to be initiated to educate all adults on basic literacy, numeric and basic life skills. This program recognizes prior learning and prepares the adult learners who are employees of the SDM to cope better with the work expectations in a changing world. The program will be enhanced in the current council Term, and conditions for career path need be created to ensure proper alignment between educational advancement and career opportunities.

In partnership with educational institutions the SDM is to conduct a research to look at the emerging skills gaps. This research will allow the SDM to engage with high schools and academic institutions to advice students on career opportunities and as well engage academic institutions in the curricula development. The SDM will also go beyond internal skills trends to advice learners, especially from the historically disadvantaged backgrounds, on skills demanding areas such as accountancy and IT skills.

# New Conditions of Service

The local government context presents a highly formalized structural arrangement of bargaining and engagement with organized labour. The Sisonke District Municipality is represented by South African Local Government Association (SALGA) in the South African Local Bargaining Council. SALGA ensures that collective bargaining strategies support the overall organizational strategies, through a consistent approach to labour conditions. The SDM managed to overcome major challenges with respect to the establishment of uniform conditions of service that creates a sound basis for equality as highlighted below.

# **Employment Equity**

The Employment Equity Act dictates that all work places promote equity in terms of gender, race and disability.

The Employment Equity Act stipulates that every employer should have an employment equity plan in place which must contain affirmative action measures, objectives for each year of the plan, and numerical goals for achieving equitable representation.

The Employment Equity policy of the SDM broadly aims at:

- Fostering diversity in the workplace;
- Eliminating all forms of unfair discrimination;
- Ensuring that all the people of South Africa are equitably represented in the SDM environment;
- Preparing the ground for effective change through appropriate and ongoing investment in training and development;

• Prohibiting and combat unfair discrimination and harassment among employees; and Provide reasonable facilities to designated groups, in particular people with disabilities.

# Planning targets for Council employment ratios that reflect the demographics of the SDM community.

The Employment Equity profile of the SDM was completed in the 2011/12 financial year leading to an Employment Equity Blueprint plan for the municipality. It is as follows:

| Group Target Actual                       |         |  |  |  |
|---|---------|--|--|--|
| African:                                  | 94.75 % |  |  |  |
| Coloured:                                 | 3.7 %   |  |  |  |
| Indians:                                  | 0.31 %  |  |  |  |
| Whites                                    | 1.23%   |  |  |  |
| People with Disabilities (Africans) 1.54% |         |  |  |  |

Overall the gender split target for the SDM is 55% males and 45% females. The Core administration has not yet achieved a 50/50% split it currently 69% males and 31%% female representation.

The SDM is closer to achieving this target and working hard toward reaching it.

The development of the Disability Management Strategy implementation will lead to the development and approval of the Disability policy by Council. Research will also be conducted on sensitivity and accommodation of people with disabilities.

Key amongst the development of the Disability Policy is to ensure that the barriers and stereotypes that directly and indirectly discriminate against people with disabilities are removed and to ensure that suitably qualified people with disabilities are accommodated on an equal basis for promotion and equitably represented in the SDM.

# **Employee Wellness Programs**

Employee Wellness is a strategic approach that is workplace based and directed at the improvement of the quality of life of employees and their families. The approach is to be facilitated by programs providing a supportive system that alleviate the impact of everyday work and personal challenges.

The Employee Wellness Programs recognizes that short-term personal and psychological related problems may adversely affect an employee's well-being and ability to effectively execute their function. It is further imperative that involvement in the programs do not jeopardize an employee's job security, compensation, promotional opportunities and / reputation, hence the need to have an integrated and well planned policy to govern implementation.

The SDM's Wellness HIV and AIDS policy will be developed to create a holistic framework for Employee Wellness through its integration of HIV and AIDS programs with its Employee Assistance Programs.

The main aim will be to manage HIV and AIDS in the workplace, to eliminate unfair discrimination and to promote a supportive environment regardless of an employee's HIV and AIDS status.

# HIV and AIDS

The management of HIV / AIDS is an important challenge facing every organization in South Africa. The SDM has determined that HIV / AIDS will have an impact on the following risk areas: operations, supplier risk, legal risk and health risk. While all these risks are under further investigation, the SDM will have to adopt the following core principles as the primary basis for a HIV / AIDS policy and action plans:

- Continuously assess the risks posed by HIV/AIDS on the SDM
- Limit the number of new infections among employees
- Ensure employees living with HIV/AIDS are aware of their rights and that their rights are respected and protected
- Provide care and support to employees living with HIV / AIDS

The SDM will adopt the view that a holistic approach to organizational health is appropriate in dealing with a health challenges facing its employees in general. The Council through the Employee Wellness programs aims at crafting strategies and actions design to address HIV / AIDS challenges on a continuous basis.

# Information and Communication Technology (ICT)

The Municipality has an established ICT section. There are two IT Technicians that have been appointed. It is the ambition of the municipality to have in future an incumbent in the Director position to head this unit. ICT is strategic and is an enabler of the municipality. There must further be security of the network infrastructure, the security of e-mails, backup of all documents and restore of the financial management billing system. The municipality has adopted ICT strategy but there are other ICT strategies and policies which still need to be developed.

#### Key challenges identified include the following:

- There is no Director or Manager position to head the section.
- The unit is not well staffed to deal with all matters related to ICT.
- The server needs to be upgraded.
- There is no ICT Steering Committee established.
- There is no Disaster Recovery Plan and Business Continuity Plan.
- There is no Disaster recovery centre where all back-up tapes are stored.
- There is no ICT Governance Framework and other policies and procedures.

# MUNICIPAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT SWOT ANALYSIS

# **3. Service Delivery and Infrastructure**

Sisonke DM is the Water Service Authority for 5 Local Municipalities. The Water Services Function as the core functions of the municipality is carried and shared among three departments that form the back-borne of the water service delivery. However the water service delivery cut across all the departments of the municipality. The three core departments are Water Services Department which is responsible for the planning and designing of the new projects and also carries the responsibility of operations and maintenance of all the water and sanitation projects and water schemes. The department also carries the responsibility of regulation and support to water services function, through the Water Governance unit. The planned and designed project proceeds to the Infrastructure Department which is responsible for implementing the water and sanitation projects through its Project Management Unit (PMU). Sisonke DM has not yet ring-fenced the water service function, hence all the financial matters are being handled by the Finance Department that deals with all the finances of the municipality.

The water service provision mandate is being guided by the number of pieces of national and provincial legislation. Locally the main document for water service provision is the Water Services Development Plan (WSDP). This key planning document has to be aligned with the Integrated Development Plan (IDP) of the municipality and it also have to be reviewed on annual bases. The water and sanitation backlog is indicated in the WSDP.

Key legislation includes:

- The Water Services Act (Act 108 of 1997)
- Local Government Municipal Systems Act (Act 32 of 2000)
- Local Government Municipal Structures Act (Act 117 of 1998)
- National Water Act (Act 36 of 1998)
- Strategic Framework for Water Services (2003)

The Water Services Department is divided into 4 operational units; Water Governance Unit, Planning and Design Unit, Operations and Maintenance Unit and Customer Care Unit. This narrative is the holistic reflection of the department' arrangement, its activities and the challenges that it is faces.

#### **Operations and Maintenance**

Sisonke District Municipality aims to provide a broad strategy to be followed with the planning and implementation of activities to ensure that adequate operations and maintenance of water services infrastructure is being undertaken.

The National Water Act, 1998 (Act 36 of 1998) states that as the public trustee of the nation's water resources the National Government, acting through the Minister of the Department of Water Affairs, must ensure that water is protected, used, developed, conserved, managed and controlled in a sustainable and equitable manner, for the benefit of all persons and in accordance with its constitutional mandate. Water and wastewater treatment works, being one of the many water users of these resources, need to comply with legislation in terms of operations and quality of water extracted and effluent returned to the environment. Sisonke District Municipality, as Water Services Authority for the region, is responsible for

ensuring that all water and wastewater treatment works comply with the legal requirements of not only the National Water Act but any other legislation governing the operations of the treatment works.

#### **Operations and Maintenance Costs Year 1 – Year 10**

Of critical importance is the funding of operation and maintenance of existing and future infrastructure as projects are commissioned and become operational. Proper operation and maintenance of physical infrastructure is more important than the implementation of new infrastructure as, unless adequate initial preventative maintenance procedures are instituted, the scheme may become inoperative. Expenditure related to staff costs are high and competent staff must be employed to manage the O&M aspects of the schemes, as otherwise the substantial capital investments towards water and sanitation infrastructure in Sisonke will be put at risk as the schemes may become inoperable.

For indicative purposes only, the Table below reflects the current and anticipated operation and maintenance costs for the schemes, indicated on a local municipality basis. The costs were based on an assumed daily water consumption of 25 I/c/d in the rural areas and 60 I/c/d in the urban areas (towns). Capital replacement costs are part of the O&M costs of a scheme and could have a significant impact on the costs. The table reflects both the scenario where the capital replacement costs are included and excluded.

| OPERATION AND MAINTENANCE COSTS FOR WATER STAND-ALONE SCHEMES (PER LOCAL MUNICIPALITIES): YEAR 1 AND |
|--|
| 10   |

| Lees Municipality  | Excl. Cap. Replacement |            |         |            | Incl. Cap. Replacement |            |         |            |

#### Tariffs

The capital costs for implementing water and sanitation projects within Sisonke District Municipality are currently from the Municipal Infrastructure Grant (MIG) through grant funding. As new projects are being funded, the Sisonke District Municipality or their appointed Water Services Provider needs to only recover operations and maintenance costs through tariffs or other levies from consumers but may have to include for future capital replacement costs.

Costing analyses, included in the Master Plans and Implementation Strategies, have been undertaken for the regional schemes and the analyses include the direct costs and indirect costs of supplying potable water. Should there be any
shortfalls in cost recovery, then the Sisonke District Municipality will need to make provision therefore in their annual budgets

## Guidelines for Norms and Standards for Water Services Tariffs

The guidelines for norms and standards for water services tariffs were developed in terms of section 10 of the Water Services Act (Act no. 108 of 1997) which allows the Minister, with the concurrence of the Minister of Finance, to prescribe norms and standards in respect of tariffs for water services.

The norms and standards are aimed at promoting socially equitable, financially viable and environmentally sustainable tariffs. The departure point in compiling these norms and standards was to provide the responsible water services institution with a framework that reflects best practice while allowing it discretion on how it actually sets and quantifies the tariffs.

It was, however, necessary to be prescriptive on the maximum consumption rate of the first block of the rising block tariff structure for uncontrolled volume domestic connections (six kiloliters per household per month). This was necessary because of the development of a national "free basic water" policy which hinges on the water services institution being able to account separately for the first 6 kl supplied to a household per month. Basic water supply has been defined under section 9 regulations.

Although the water services authority will either be setting tariffs, or deciding the parameters within which tariffs are set, water services providers may in some circumstances set tariffs within the prescribed parameters. It is important to note that these regulations apply to all water services institutions and that no water services institution may use a tariff which is substantially different from any prescribed norms and standards.

## Determination of revenue requirements

A water services institution must, when determining its revenue requirements on which tariffs for water services are based, take into account at least the need to -

- recover the cost of water purchases;
- recover overhead, operational and maintenance costs;
- recover the cost of capital not financed through any grant, subsidy or donation;
- *provide for the replacement, refurbishment and extension of water services works and;*
- ensure that all households have access to basic water supply and basic sanitation.

The purpose of this regulation is to ensure that the tariffs set by a water services institution are financially sustainable. This is achieved by ensuring that all costs incurred in providing the service are recovered through the tariff.

The cost of water purchases is the amount that the water services institution is charged for bulk raw water or bulk potable water. The raw water charge is typically levied by the Department of Water Affairs or a Catchment Management Agency for untreated water supplied from a river, a dam or from a borehole. The bulk potable water charge is levied by the bulk water services provider for potable water (drinking quality water) supplied in bulk to a municipality or water services provider for further distribution. The cost of bulk potable water would normally include the bulk raw water charge paid by the bulk water services provider to the Department of Water Affairs or to the catchment management agency.

The overhead, operations and maintenance costs include the cost of the administrative and operations staff, their vehicles and offices, the cost of electricity and chemicals, and the cost of maintaining the equipment. The cost of capital includes the cost of constructing new works or the cost of repaying the loans and interest charges associated with the construction costs. Grants from national government for capital works such as the funding from Reconstruction and Development Programme do not have a cost of capital.

Replacement, refurbishment and extension of water services works are also capital costs. A provision should be set aside specifically for replacing or refurbishing worn out equipment. Provision should also be made for extending works that are no longer able to meet the demand because of capacity constraints.

One of the main objects of the Act is to provide for the right of access to basic water supply and basic sanitation. Section 3 of the Act requires that every water services institution to take reasonable measures to realize these rights. The water services institution should thus provide for ensuring that all households have access to basic water supply and basic sanitation.

## Categories and levels of water services

- i) A water services institution must, when setting tariffs for water services provided to consumers and other users within its area of jurisdiction, differentiate, where applicable, between at least the following categories –
  - water supply services to households;
  - industrial use of water supplied through a water services work;
  - water supply services other than those specified in paragraphs (a) and (b);
  - sanitation services to households;
  - discharge of industrial effluent to a sewage treatment plant; and
  - sanitation services other than those specified in paragraphs (d) and (e).
- *ii)* A water services institution must, when setting tariffs for providing water services to households, differentiate, where applicable, between at least the following levels of service-
  - the supply of water to a household through a communal water services work;

- the supply of water to a household through a water services work or consumer installation designed to provide a controlled volume of water;
- the supply of water to a household through a water services work or consumer installation designed to provide an uncontrolled volume of water;
- the provision of sanitation services to a household not connected to a sewer and;
- the provision of sanitation services to a household connected to a sewer.

# Supply of water to a household through a communal water services work or through a consumer installation designed to provide a controlled volume of water

A tariff set by a water services institution for the supply of water to a household through a communal water services work or through a consumer installation designed to provide a controlled volume of water must be set at the lowest amount, including a zero amount, required to ensure the viability and sustainability of the water supply services.

The Water Services Act emphasizes that the primary consideration in water services policy is the provision of a "basic water supply" to all households. The purpose of this regulation is to ensure that the tariff for a basic level of service is affordable even to the very poor. This regulation applies amongst others to communal stand pipes and to installations such as the Durban tank system which provide a limited quantity of water per day.

According to the Department of Water Affairs policy on a free basic water supply, a water services institution should make every effort to supply the basic water supply quantity of six kilolitres per household per month free of charge. It would be the norm for users supplied out of standpipes and by means of controlled volume supplies (depending on the size of tank) to use no more than a basic supply and it would also be expected that these users will generally be representative of lower income groups. It should thus be the norm for such users to be supplied free of charge, or at the lowest cost that the water services institution can afford.

# Supply of water to a household through a water services work or consumer installation designed to provide an uncontrolled volume of water

- A tariff set by a water services institution for the supply of water through a water services work or consumer installation designed to provide an uncontrolled volume of water to a household must include a volume based charge that –
  - supports the viability and sustainability of water supply services to the poor;
  - discourages wasteful or inefficient water use; and
  - takes into account the incremental cost that would be incurred to increase the capacity of the water supply infrastructure to meet an incremental growth in demand.

- ii) The requirements of sub-regulation (1) are deemed to have been met where the tariff is set as a volume based charge that provides for a rising block tariff structure which includes
  - three or more tariff blocks with the tariff increasing for higher consumption blocks;
  - a consumption level for each block defined as a volume consumed by a household during any 30 day period;
  - a first tariff block or lowest tariff block with a maximum consumption volume of six kiloliters and which is set at the lowest amount, including a zero amount, required to ensure the viability and sustainability of water supply services; and
  - a tariff for the last block or highest consumption block set at an amount that would discourage high water use and that reflects the incremental cost that would be incurred to increase the capacity of the water supply infrastructure to meet an incremental growth in demand.

## 4.1 Water Services

## Provision of sanitation services to a household

- *i)* A tariff set by a water services institution for the provision of sanitation services to a household must
  - support the viability and sustainability of sanitation services to the poor;
  - recognise the significant public benefit of efficient and sustainable sanitation services and;
  - discourage usage practices that may degrade the natural environment.

The purpose of this regulation is to give guidance on the objectives to be achieved with a domestic sanitation tariff while accommodating different approaches by not being overly prescriptive.

Poor sanitation practices impact negatively on the health and wellbeing of the whole community and also on the environment. A water services institution should support the viability and sustainability of sanitation services to the poor by providing basic sanitation services (for example the removal of sludge from pit latrines) at as low a cost as it can afford to and preferably for free. The provision of low cost or free basic sanitation services would concurrently promote the use of sanitation practices that safeguard the public from diseases and would also discourage the uncontrolled disposal of raw sludge into the natural environment, such as the emptying of buckets into streams.

It is expensive and unnecessary to measure water borne sewerage. Rather, the sanitation tariff for water borne sanitation systems should be based on the volume of water supplied. A volume based sanitation charge levied on the higher water supply tariff blocks with no sanitation charge levied on at least the first 6kl would contribute towards the objectives set out in this norm.

Practices that base sanitation charges on factors that are not directly related to usage, such as the number of toilets, the property value or plot size are discouraged.

| Municipality                       | Households | Backlog | Percentage Backlog |
|------------------------------------|------------|---------|--------------------|

## **Sanitation Services**

Stats SA 2011

## 4.2 Waste management service delivery strategy and main role-player

This is the monitoring of waste management system – such as refuse, health care risk waste, hazardous waste and sewerage or waste water. The Sisonke district municipality's area of jurisdiction has got health facilities that produce health care risk waste (Hospitals, Clinics and surgeries) and different commercial operations and residents that also produce waste. The district municipality and its five local municipalities have to make sure that every waste produce is deal with in a proper manager and that it is stored, transported, treated and disposed properly.

A summary of the disposal facilities which exist within the Sisonke District Municipality are:-

- 1. The Ingwe Municipality has 1No operational landfill site in close proximity to Creighton. This landfill site is not permitted in accordance with the DWAF Minimum Requirements,
- The KwaSani Municipality existing waste disposal site situated in Himeville is now converted to a transfer station. The waste is transported to the Pietermaritzburg waste disposal site,
- 3. The Greater Kokstad Municipality has 1No permitted waste disposal site in accordance with DWAF Minimum Requirements and is in the process of closure,
- 4. The UBuhlebezwe Municipality has No1 compass waste incinerators located in Ixopo, which has been officially closed. The waste from this municipality is currently being disposed of at UMzimkhulu landfill site,
- 5. The UMzimkhulu landfill site is not permitted in accordance with DWAF Minimum Requirements

#### Levels and standards in waste management services:

The Sisonke District Municipality has developed an integrated waste management plan for the district. This plan has been approved by SDM Executive Committee, which will address all the waste problems as ascertained within the district. Each local municipality will have its own landfill site expect for KwaSani and Ingwe who will share one land fill site. The plan is develop by the district as per the statutory document (Municipal Structures Act 117 of 1998 as amended from time to time) section 84d and e which the latter indicate that, the district municipality shall ensure that waste disposal facilities for more than one local municipality in our area of jurisdiction.

## Major challenges and remedial actions with regard to waste management services

The Sisonke District Municipality has developed and approved integrated waste management plan for the district which will address all the waste problems as ascertained within. The Municipality Health services are the overlooking section to ensure that waste management is taken care of and its activities include:

- Complaints investigation and inspections on all activities relating to waste or any production resulting thereof.
- Ensure proper refuse disposal
- Sampling and analysis of waste.
- Advocacy on Sanitation.

- Ensure proper handling, storage, collection, treatment and disposal of health care risk waste, hazardous and general solid waste
- Improve and control the handling and disposal of human tissue.
- Ensure proper facilities and containers are provided by the relevant departments
- Recycling sites, sewerage and water works.

# **Expanded Public Works Program (EPWP)**

The EPWP is one government's short-to-medium term programs aimed at alleviating and reducing unemployment. It is a national program covering all spheres of government and state owned enterprises (SOEs).

Sisonke District Municipality always strives to plough back to its communities by creating as much job opportunities, poverty alleviation and transferring of skills. In all the projects that are implemented by the municipality the EPWP guidelines are implemented to a certain level. This involves the appropriate mix of labour and machines, with a preference for labour where technically and economically feasible, without compromising productivity and quality. The employment of local labour and providing them with training when projects are being implemented and labour intensive projects has been on going and the municipality is continuing with such programs in the up-coming financial years.

The opportunity for implementing the EPWP was identified and within the infrastructure the emphasis is on job creation through the implementation of labor-intensive project coupled with training. It is stipulated in the Code of Good Practice for Special Public Works Programs that workers are entitled to formal training.

There are three projects which have been earmarked for Labour Intensive Methods, which are Eradication of Sanitation Backlog in Greater Kokstad, Eradication of Sanitation Backlog in UBuhlebezwe and Ingwe Household Sanitation.

The training will be conducted by an accredited training providers appointed by the Department of Labour. Skill such as bricklaying, plastering and administration will be transferred. These will assist the communities of Sisonke to develop their enterprises and to alleviate poverty.

## **Contractor Development Program:**

Further to the above Sisonke is in the process to sign a Memorandum of Agreement with the Independent Development Trust (IDT) to take on board 30 contractors for contractor development program. Accredited service providers will train these emerging contractors. The objective is for them to obtain a formal training; they will have to undergo a certain amount of practical experience on site.

The process is well advanced with the following points to be considered:

- Timelines are being set jointly by stakeholders
- Candidates are being short listed through a formal transparent process.

- Suitable labor-intensive projects are being selected.
- Legal contracts are being drafted
- Mentorship support programs are implemented
- Funding mechanisms (council) are being put in place.

# 5.1 Local Economic Development and Social Development

## 5.1.1 Municipal Comparative and Competitive Advantage

The strategy noted the following competitive advantages present in Sisonke District Municipality. These include:

- i. Strategic location if the transport infrastructure can be improved;
- ii. Abundance of natural resources and agricultural land and potential to establish forward linages with manufacturing initiatives;
- iii. Availability of low-cost labour; and
- iv. Aesthetically pleasing surroundings

However, the following constraints were identified

- i. Cost factors, including the high cost and limited availability of land and rising input cost of agriculture;
- ii. Unresolved land claims;
- iii. Limited water resources for irrigated agriculture;
- iv. Availability of skilled labours; and
- v. The effect of the recent financial recession

The issue of land and land usage are controversial issues in the district, particularly given the importance of agriculture to the district economy.

## 5.1.2 Main Economic Contributors

Agriculture, community services, and retail trade were identified as main economic drivers of the district municipality. These sectors made contributions of 33.5 %, 33.3 %, and 12.8 % in 2011 respectively to the district municipality economy. Finance and construction are the fastest growing sectors of the local economy, yielding average growth rates of 8.1 %, 4.0 %, and 3.8 % respectively. Clearly community services and agriculture are the most significant sectors of the Sisonke District Municipality economy and together also contribute 60 % of the district's Gross Value Added (GVA). Other leading industries include the retail trade sector and the finance sector, with the manufacturing sector contributing no more than 6 % to total district GVA.

## Figure 10: Share of Gross Value Added by Region (GVA-R) by Industry: Sisonke District Municipality: 2011

Source: Global Insight MetaData 2011

The dominant role played by agriculture in the district economy is evident. Agricultural activities within the Sisonke District Municipality are crop farming (i.e. potatoes and cabbages) and dairy farming. The agriculture sector is indeed one of the main sectors in the region contributing to the regional economy. There are also commercial forestry plantations that provide raw materials for wood-related products. Other suitable agricultural activities that have potential for growth in the region are carrots, maize, oats, soybeans, tomatoes, wheat, sorghum, sunflower and livestock. The agricultural sector in the Sisonke District Municipality has been one of the largest sectors of the district economy. Unfortunately, the sector is failing to fulfill its potential.

A trend analysis allows a greater appreciation of the make-up of the Sisonke District Municipality economy, particularly in light of the recent economic recession. The growing capacity of the public sector in the district can be clearly charted, with GVA of community services increasing from R 365 million in 1996 to R 1.513 billion in 2010 (an increase of over 400 %). Analysts estimated that community services will continue this rate of growth over the next four years, reaching R2.539 billion in 2015 (an increase of 168 %). In that year, community services are projected to make up almost 39 % of the district's GVA. Agriculture, in contrast, has grown in a more haphazard and slow fashion, buffeted by the often abrupt variations of national and international markets. Indeed, it is clearly evident that agricultural GVA in the district has declined in real terms between 2007 and 2010, no doubt in part caused by the recent financial recession. The Sisonke District Municipality is located outside the major manufacturing sectors of the KwaZulu Natal economy, and therefore it is unsurprising that manufacturing in the district has remained weak and effectively stagnant, showing only slow signs of growth and appreciation since 1996.

Looking into the future, growth in the agricultural sector is predicted to be relatively stagnant at 1.6 % on average for the period 2010-2015. Unfortunately, there are constraints inherent to certain economic sectors that hamper potential economic growth. For example, no matter how one might expect agriculture to expand, a completely unforeseen dry spell over a few years can have a detrimental effect. Growth in the manufacturing sector is predicted to be relatively stagnant at 2.5 % on average for the period 2010-2015

## 5.1.3 Employment and Income Levels

## Employment

The Sisonke District Municipality had one of the lowest Economically Active Populations (EAP) in the Province of KwaZulu-Natal in 2010. The district has the 3<sup>rd</sup> most economically inactive in the province after uMkhanyakude and uMzinyathi. In comparison to other district municipalities, it can be said that Sisonke District Municipality faces challenges creating local economic development for a community with such a large proportion of residents classified as non-EAP.

Evidence suggests a significant number of single women households, husbands working as migrant workers or have died (often this can be linked to HIV/AIDS-related causes). However, although female entrants into the labour market have meant there has been a gradual increase in the female EAP, the total number of women in EAP (35,579 in 2010), is still

significantly below the male EAP (43,127 in 2010). It is apparent that the district is still dominated by men, indicating the dominance of specific gender attitudes and mindsets that attempt to derail the opportunities created for women.

Job creation presents a significant challenge for the Sisonke District Municipality and is a significant contributor to poverty levels in the District. More than 20,000 residents could be classified as unemployed (using the official definition) in 2010. However, this represents a decline in number of unemployed from a 2007 high of more than 45,000 residents. However, when an expanded definition of unemployment is used, it is evident that joblessness in the district is high, significantly higher than that of neighbouring districts. There is in addition, evidence of underemployment in the district with a significant share of residents identified as employed (21%) reported working less than 20 hours per week.

In terms of the economic viability of job creation, the Sisonke District Municipality has faced significant challenges including low skilled working age population, undeveloped industries, weak domestic consumer markets, and limited infrastructure capacity. However, despite these challenges the district economy had created jobs in the past decade and a half in the lucrative formal sector – where wages and working conditions have been shown to be better than the informal sector.

Some concern has been voiced that the district suffers as a result of difficulties around attracting highly skilled individuals to the Sisonke District Municipality and that economic growth is constrained by the migration of skilled workers to bigger cities. In view of this, skills development is an important focus area, to ensure that the District can create a skilled community exhibiting capabilities, self-reliance, innovation and continued re-skilling to meet the needs of a growing economy.

Challenges facing the education in the district can be summarized as follows:

- i. Lack of adequate schooling facilities;
- ii. Lack of electrical reticulation within rural areas;
- iii. Poor road networking within the rural areas;
- iv. Topographical barriers that limit movement;
- v. Inadequate water and sanitation facilities;
- vi. Affordability levels for transports costs; and
- vii. Inadequate human capital within the district educational institutions.

In order to address the severe skills crisis in the district, these challenges have to be addressed.

The share of employment by industry for 2010 is illustrated below.

Source: Global Insight MetaData 2011

## **Income levels**

The vast majority of the job holders in the district are relatively poorly paid and in comparison with other districts within KwaZulu-Natal, the Sisonke District Municipality contains an alarming number of poor residents. However, since 2002, strong overall income growth (Including the expansion of social grants) has resulted in the rise of the income of the district population. Annual per capita income has increase from R3,996 in 1996 to R5,901 in 2001 and has grown exponentially in the period 2002-2010 reaching R13,137 in 2010. But, the rate of improvement of income of the poor has not matched that of the rich, and thus while income poverty is declining, inequality has not been reduced. The income gap in the district has widened in the last decade – the Gini coefficient rose from 0.58 to 0.62 over this period. This level of inequality is one of the widest gaps in the province.

The income inequality can be observed if an income distribution is considered. The figure above depicts the distribution of employed residents across monthly income categories using the 2011 Census. It is evident that of those employed; most

workers earn low levels of remuneration. Nearly 80% of Sisonke District workers earn R1,600 per month or less while 40% earn R800 or less. In stark contrast, very few workers earn R122,800 per month or more – less than 2%.

Given the above, it is not surprising that the Sisonke District Municipality is home to a significant number of residents who could be classified as living in poverty. In 2010, almost 350,000 residents could be classified as "poor".

## 5.1.4 SMMEs

Small businesses have a major role to play in the South African economy in terms of employment creation, income generation and output growth. They are often the vehicle by which the people with the lowest incomes gain access to economic opportunities and thereby redressing the economic challenges. Business support facilities that service SMMEs have increased the sustainability of SMMEs throughout the country. These facilities include among others business information kiosks, service centres, hives, clusters and incubators.

The National Strategy for the Development and Promotion of Small Business identifies the Small Enterprises as the key contributors to rural development. Its primary objective is to create an enabling environment for small enterprises. In the Sisonke District Led Strategy, small business has been identified as a sector that needs consideration to facilitate economic growth and development in the area.

SMME development and promotion includes nurturing, supporting and growing of sustainable and profitable businesses which create more job opportunities. Other objectives include:

- Improving market access and business linkages to assist SMMEs to find opportunities
- Create an enabling environment through the review of municipal by-laws particularly hawking, street vending and home businesses and legislation impacting negatively on SMMEs
- Facilitate and coordinate the provision of physical infrastructure to support SMME e.g. water, electricity, trading facilities.

The programme is made up of the following projects:

- Contractor development programme
- SMME Development Strategy and implementation plan
- Sector specific and need oriented SMME seminars
- Business registration and advisory office
- SMME database (per sector)

Financial implications: The programme is budgeted for in the current financial and next financial year.

Role players:

- DEDT SMME unit
- Esayidi FET

- All LMs
- SEDA

#### 5.1.5 Agriculture

With the district being richly endowed in natural resources, and having some of the best soils in the province, abundant water, and good rainfall, it is no surprise that agriculture sector plays a decisively dominant role in Sisonke District Municipality. In fact, its role is so dominant that the district's economic growth rates are closely linked with that of the agricultural sector. Agriculture contributes proportionately more employment in Sisonke District Municipality in rural KwaZulu-Natal than it does to employment in South Africa as a whole. Moreover, a discrepancy between actual and potential production indicates a significant percentage of farmland has not been developed to its fullest.

#### Dairy

The Sisonke District Municipality currently has a competitive advantage in terms of the domestic dairy industry: the district produces 10% of the milk consumed in South Africa – in Kwa-Sani Municipality alone, 400 000 litres of milk are produced a day – and 35% of Clover Milk is from this area. Moreover, the Ixopo Milk Procurement depot has a major capital expansion project which is set to result in a +/- 4% increase in Clover's total intake in the 2012/13 financial year. Moreover, the industry is expected to grow by approximately 5% per annum for the next 5 years.

Current research suggests that imports of value added milks products (import substitution) in the district municipality mean that there are opportunities for value added milk products for local markets. This opportunity is further heightened by:

- 1. Well established markets and value chains;
- 2. Local pasture based production is more efficient and;
- 3. Growing demand for consumption in KwaZulu-Natal.

There are however some challenges in the dairy industry, particularly with the shelf-life of milk forcing farmers to accept whatever price is offered to them by producers/processors in order to dispose of their products. The market is also dominated by 4 major processors, making it extremely difficult for emerging markers to make inroads in the dairy processing industry.

#### Forestry

Forestry is an important part of the economy for Sisonke District Municipality. In 2010 the forestry sector contributed over R331 million to the district's GDP and constituted more than 8% of the district's economy. In uBuhlebezwe Local Municipality for example, as in most of the district, most of the land is arable for forestry. Moreover, timber producers in the district have indicated that there is still a growing demand for timber to be produced, as the market has not yet reached saturation.

Timber is mainly produced by Sappi, Mondi, Mondi/Shanduka, Mesonite, NTC and some private farmers. Some of the private farmers have their own plant (e.g. Flaxton) and treat their own timber. Timber production involves growing

eucalyptus, pine and wattle species, with the eucalyptus species predominating, Timber operations involve silviculture, harvesting, protection, roads and open area management. There are also value-added opportunities in pyro wood, as an alternative low smoke energy source.

A limited number of emerging farmers are engaged in timber production through SAPPI or government-supported grower's schemes. This may be due to challenges facing businesses in the FTPP market. Many of these arise because the industry is vertically integrated with large players in saw milling, pulp, and paper production owning their own plantations. This creates an unfavourable situation because:

- Small players experience problems securing supplies, this is especially unfavourable since demand exceeds supply
- It creates barriers to entry for companies because it increases the risk of not securing raw materials
- It creates incentive for firms to restrict output, raise prices, collude or foreclose non-integrated firms from accessing vital inputs.

Moreover, the environment cannot support an extensive expansion of existing plantation area- the water and ecology of the district and its municipalities would be severely damaged by future extensive forestry plantation and growth. Issues therefore need to be addressed to maximise fibre production and ensure a sustainable supply of raw materials. A major issue here is the increase in fire-related damage and the land restitution process. The major challenge is thus to address the major risk faced by small producers who lack resources and knowledge for fire risk management.

#### Commodities

Sisonke district is ideally suited for field crop production. Several factors impact on the productivity and growth of the sector, namely: growth in the SA economy and rising consumer demand; international trade and trade agreements; the global recession and rise in food prices; the land reform programme; reliance on imports; water availability; changing consumer patterns and demands (e.g. organic food stuffs); rising costs of agricultural inputs ; technological changes and mechanisms; quality standards; farm safety and security; broad based black economic empowerment; skills demand and supply; HIV/AIDS; and changing climate.

#### Maize

Maize is the most important grain crop in South Africa, and the second largest crop produced in the country after sugar cane, and it is grown in Sisonke District. There has been an average gross value produced of R7 156 million over the past 10 years. Export capacity is enhanced by presence of Durban harbour.

Of all maize consumed in South Africa, 50% is by humans, 40% for animal feed, 10% for seed and industrial uses. Use include: animal feed; maize meal; samp, maize grits, maize rice; starch paste for paper coating and sizing, textile sizing, corrugated boards and adhesives; maize oil in soap, salve, paint, rust roofing, inks, textiles, insecticides; margarine; and as a carrier molecule in pharmaceutical preparations.

Factors influencing production include: increases in average producer prices; deregulation of agricultural marketing; international market conditions; the transport situation; and GMO maize threatening the domestic markets.

## Citrus fruit

Products from citrus farming are among the highest in world exports rankings in South Africa, with oranges ranking 3rd, lemon and lime ranking 7th, grapefruit ranking 4th, and naartjie ranking 8th. There is a high level of fruit production in many parts of Sisonke District Municipality, and great potential for improved returns if more farmers engage more in processing of fruits. Case studies suggest that small-scale fruit and vegetable processing has potential these improved returns will come as long as appropriate processing equipment, processing skills, packing materials, and marketing information are made available. This operation does not require much investment in equipment. The challenges that are faced for SME's have to do with high distribution costs, and high cost of packaging.

#### Potatoes

Potatoes are the most important crop in SA, are particularly prominent in Sisonke District Municipality. This is because the climate and the soils are well suited for potato farming. Most production is for domestic markets, however processed potatoes are exported. Moreover, domestic demand for potatoes and potato-related products is increasing. Potatoes make up 44% of total gross value of vegetable production, 14% of horticultural production, and 7% of total agricultural products. 1.86 million tons were produced in 2009.

Value-added opportunities are mainly limited to frozen, dry, and fresh chips; and canned potatoes. However, there is an opportunity in making flour from sweet potatoes.

Factors influencing production include: expansion of the fast-food industry; higher average income of the population; the rapid rate of urbanization; and the influx of international processing companies. Competition is also very strong for emerging farmers.

## Livestock (beef)

Livestock farming has a very long history in the district. Kwa-Sani Local Municipality alone contributes a substantial amount to total agricultural income in the area. The number of cattle slaughtered has increased, mainly due to increasing demand. The beef supply chain is also becoming increasingly vertically integrated, with feedlots owning abattoirs.

However, beef farming in Sisonke is hindered by the lack of an abattoir in the area. The industry also faces a difficult environment in the district. Beef production has declined, causing the Ixopo Agricultural Society to be dissolved. This is unlikely not to improve as there are currently no projects involving commercial cattle production.

### 5.1.6 Tourism

Ecotourism is one of conservation's major economic engines, making a R545 million contribution to overall provincial GDP in 2010. Moreover, Sisonke district alone, saw a 20% increase in employment from tourism between 2000 and 2010 (from 552 to 678). As such, the Sisonke public sector management team has expressed a deep commitment to promoting the

district's tourism industry. However, Sisonke tourism is not limited to ecotourism alone, the district also engages in avitourism, rail tourism, mission tourism, and cultural tourism.

#### Avi tourism -

Avi tourism is a form of ecotourism relating to birding: it forms the single largest group of eco-tourists globally. Sisonke has two top national birding spots, and nine Important Birding Areas (IBAs). The bird list features more than 300 species including 63 endemic and 67 threatened species. Sisonke is also proud to be home of the rare and endangered Blue Swallow, and Yellow Crane.

Places of interest for avi-tourists would be the Sisonke Birding Route, and the Marutswa Forest Trail & Boardwalk close to the quaint country village of Bulwer.

#### Rail tourism –

Ingwe Municipality, in the Sisonke District, has a fully-fledged rail tourism train, "Sisonke Stimela". The train is pulled by one of three beautifully restored steam locomotives, and consists of 21 luxury suites with handsome wood panelling, and air conditioning. Aboard the Sisonke Stimela, a nostalgic journey can be experienced through unspoilt Africa, an experience never to be forgotten!

#### Mission tourism -

This a vibrant tourist attraction, found in the Umzimkhulu and Ingwe local municipalities. The missions have a deep history, established by the Trappist brothers in KwaZulu-Natal. Reichenau was the first, established in 1886 in response to chief Sakayedwa's request for schools within his community. The Centecow Mission in Creighton was later formed, now one of the largest mission centres, and houses the Gerald Art Gallery and Museum. Other Trappist missions that followed were the Emmaus, Kavelear, Lordes and Mariathal.

## Cultural tourism –

Being very rural, Sisonke has a very rich cultural base and thus cultural tourism has vast potential throughout the district. The industry is based on traditional villages; production of Arts and Craft; and Traditional Dancing to mention but a few. Umzimkhulu Gateway is a great tourist attraction, which converted a former border-gate building in Umzimkhulu into a tourist information centre which includes a crafts centre, museum, and coffee shop. Other areas of interest include a cultural village in Greater Kokstad IDP.

#### 5.1.7 Manufacturing

Within the landscape of manufacturing, the Sisonke District Municipality does not occupy an important place, and cannot be considered an important manufacturing centre in a provincial context. Moreover, the most important manufacturing industries for the district are mainly value-added agricultural products, such as food, beverages, and tobacco products. One could say the manufacturing industry in Sisonke District is centred towards agri-processing. The most significant manufacturing area in the district is the urban area surrounding Kokstad. In the economic realm, manufacturing contributed no more than 6.3% of the district's economy in 2010. GVA-R was 6%, and GDP contribution, 7%. Less than 3,000 people were employed in the manufacturing sector in 2010.

Barriers to development include the following:

- Limited transport accessibility
- Poor infrastructure
- Inadequate business networks

#### 5.1.8 Services

The service industry has been growing rapidly in Sisonke District, as was shown in section 2 of main economic contributors. The Service industry saw a growth of about 50% between 1996 and 2010, and growth of a further 20% is expected by 2015. The services industry is thus a noteworthy economic driver. Within the industry, retailing is one of the subsectors that was seen to have the highest levels of growth in the last decade and a half.

Growth in jobs in the services industry was also seen to be led by the retailing trade. Along with wholesale, retail trade reflected a growth in jobs from 1066 in 1996, to more than 2100 jobs in 2010 – an increase of more than 100%.

The success of the retail industry is to some extent accredited to the fact that many towns in the district are not much more than trading and services centres. Ixopo and Highflats for example, are typical commercial nodes. The types of products sold there are predominantly to serve the rural population and are thus mainly perishable and processed products, household furniture, clothing and footwear, and other household necessity items. These are products characteristic of the retail industry.

## 5.1.9 Mining

This is not applicable to Sisonke District.

#### **LED Projects**

Programmes involved in led include:

- SMME Development Programme
- Contractor Development Programme
- SMME Development Strategy And Implementation Plan
- Cooperatives Development Programme
- Sector Forums
- Informal/Street Traders Development Programme

## **Cooperatives Development Programme**

Cooperatives are the key contributors to rural development. Therefore as a district our primary objective is to create an enabling environment for local economic development to thrive.

A co-operative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly owned and democratically controlled enterprise.

The Cooperatives Development Programme is made up of:

- Cooperatives Development Strategy and Implementation Plan;
- Cooperatives database as per DBSA jobs fund; and
- Skills development as per DBSA jobs fund Role players:
- SDA
- LMs
- SDM

## Sector Forums

These sectoral forums will leverage partnerships between informal and formal businesses. They will also serve as a platform for interaction between the SMMEs, private sector, relevant sector departments, and government agencies etc.

Role players:

- SDA
- LMS
- SECTOR DEPARTMENTS
- PRIVATE SECTOR

## Informal/Street Traders Development Programme

Informal trading is referred to economic activity by individuals and/or groups involving the sale of legal goods and services, within public and private spaces, which spaces are generally unconventional for the exercise of such activity. It is generally unorganized and not always registered as a formal business activity. In its most basic, informal trading takes place on streets and pavements, on private property (used primarily as the entrepreneur's place of residence) and tends to require little more than the actual goods and services to set up.

There are many constraints which impact negatively on informal traders; to name a few:

- Lack of access to financial services such as credit and savings
- Limited access to training in areas such as business skills, technical training and other basic education and training;
- Limited access to infrastructure and basic services like housing, water, electricity, rubbish removal;
- Limited access to business related infrastructure such as manufacturing space, closeness to others involved in similar activities, as well as, trading and storage space.

Municipalities and informal traders have dynamics that they also have to deal with. These dynamics are similar to challenges but in this context they deal with inter-and intra- relationships between and among people and the organizations they represent. These dynamics are:

- Relationships with police are always strained, especially law enforcement agents who are viewed as antagonistic to informal trading per se;
- Perception by informal traders that foreigners are taking over their business and mainly their trading space (xenophobia)6 This is now taken as a fact of life;
- Tense and frustrating relationships with local municipalities, especially where informal traders" goods are constantly being confiscated and impounded (whether correctly or otherwise);
- Intermittent suspicious and frustrations by informal traders due to site allocations and the function of processing permits by municipalities; hence unhealthy cooperation between authorities and informal traders.

Municipalities also face challenges in dealing with informal traders, which are:

- Instability and vulnerability of informal traders" representation and associations;
- Proliferation of Informal trading organizations in each city or town, where organizations are fighting for recognition, support and power;
- (related to above) multiple structures within municipalities, (which usually do not plan and operate jointly) are mandated to facilitate, manage, implement and monitor informal trading;
- Complex co-ordination processes within municipalities, each using its own strategies;
- No common denominator: between hawkers on their constitutional rights to trade and the municipal by-laws prohibiting them from trading on specific sites.

There are projects that will be implemented to deal with these challenges, which are

- Informal/street traders development strategy and plan Informal traders database
- Skills development

Role players:

- DEDT;SEDA
- SDA;SDM
- LMS

## SWOT ANALYSIS

| STRENGTHS  | WEAKENESSES                   |
|--|-------------------------------|
| <ol> <li>A rich data repository in the form of district socio-<br/>economic profiling on the bases of which<br/>evidence- based planning is possible.</li> </ol> | Lack of institutional outlook |

| 2. | Strong, diversified leadership & capable management.   | Compromised institutional mage in the form of current premises   |
|----|--|--|
| 3. | Unqualified shareholder support.   | Lack of professional financial management oversight              |
| 4. | Untainted insisting reputation.  | Potentially compromised financial management oversight           |
| 5. | Enduring political stability that makes the district on attractive trade & the investment destination.                   | Lack of structured, professional brand<br>communication strategy |
| 6. | A strong & the investment industry (mainly agriculture) base which can be developed for optimal production & processing. | Limited financial resource                                       |
| 7. | A Solid & strong resource base (good climates, soils, rainfall and water) malaria free (good for tourism).               | Lack of professional department draining among staff             |
| 8. | Relative case of access and proximity to Durban,<br>Pietermaritzburg & the N3 Corridor                                   |  |
| 9. | Relatively well developed in infrastructure  |  |

| OPPOR <sup>®</sup> | TUNITIES   | THREATS   |
|--------------------|--|---|
| 1.                 | Strategic partnership  | Pronounced in equalities across region in the district undermines social cohesion.                  |
| 2.                 | Establishment of skills development<br>institution to service local industry & for<br>"export" to the rest of the province & country | Possible flight of commercial agricultural skills if land reform programme is not managed property. |
| 3.                 | Tourism Development  | Water inadequacy.   |
| 4.                 | Art & Craft  | Climate change & implications of spheres of government e.g water licensing.                         |
| 5.                 | Agricultural Shows   | Capabilities in disease control in agriculture.   |
| 6.                 | Youth development events/ Greer/<br>Vocational guidance & training/ sport.   | HIV/AIDS & impact on labour productivity & adequacy.  |
| 7.                 | Partnerships with established commercial farmers for skills development & transfer to emerging black commercial farmers.             | Forest & other fires hazard.  |

# **5.2 Social Development Analysis**

# 5.2.1 Broad Based Community Needs

# 5.2.2 Education

Though the District appears to have fairly adequate schools, much of education-associated problems are experienced in farm and rural schools. Existing schools do not offer up-to-standard science and technical subjects. School property is continuously vandalized. Most schools lack water and sanitation.

These problems mainly affect young people. Lack of electricity in the schools also precludes sharing of educational facilities by adults through Adult Based Education and literacy Programmes. The challenges facing education in the district can be summarized as follows:

- Lack of adequate schooling facilities;
- Lack of electrical reticulation within rural areas;
- Poor road networking within the rural areas;
- Topographical barriers that limit movement; and
- Affordability levels for transport costs.
- Inadequate water and sanitation facilities

## Effects or consequences of the problems are:

- Low educational levels;
- Low science and technical skills base;
- Out-migration of youth to urban areas;
- High unemployment rates;
- Lack of proper care for elder people (pensioners);
- High dependency rates; and
- Employment to low paying jobs.
- Poor payments for services rendered by the municipality.

## 5.2.3 Health

## SUB-PROGRAMME: HIV & AIDS, STI AND TB CONTROL (HAST)

The Sisonke District HAST program is planned and implemented within the framework of the Primary health Care approach, the District Health System, its referral and support services. Its funding source is from the Conditional grant and from the equitable Provincial share budget.

The HAST Program management is based on the National Strategic Plan and KZN Provincial Strategic Plan 2012-2016 with the following Priorities Areas:

## Address Social and Structural Drivers of HIV and TB Prevention, Care and Impacts

## **Prevention of New HIV and TB Infections**

#### Sustain Health and Wellness

#### Ensure protection of Human Rights and increase access to Justice

The interventions for Prevention of new infections for HIV are using biomedical approach i.e. PMTCT, Male Medical Circumcision. HCT campaign was run successfully in 2011/2012 with 145 685 tested reaching the target number that was set by the Province; the target for 2012/2013 is 174857. The social prevention interventions focused mainly on behavioral change program using community dialogues and the stepping stones program.

HTA at Kokstad is the only functional site with staffing rendering screening services and comprehensive STI management, the data is submitted to PHC and captured on DHIS.

At Ingwe sub district Park home at Bulwer taxi rank was purchased for HTA awaiting Municipality to connect electricity and water.

Condom distribution rate is still a challenge that needs to be addressed, strategies to increase the rate like targeting CCG 's to identify hot spots in their areas of work to ensure good coverage of distribution. Primary distribution sites identified within the district to enable the district to contract a condom service provider for condom distribution.

The ANC HIV prevalence rate in 2008 was 35.8% with the slight decline in 2009 statistics to 35.2% however 2010 is marked with an increase to 37.2%. The estimated HIV prevalence for 2011 35.8%. IPT program is provided in all facilities but it still needs improvement.

The uptake of Male Medical Circumcision remains low, this mostly attributed to traditional practices especially at Kokstad sub- district and UMzimkhulu, which leads to non-compliance to MMC norms by sub districts and unknown baselines of circumcised men traditionally and private practitioners before the implementation of the MMC strategy. Kokstad traditional circumcision has opened up for partnership with Dept. of health to minimize infection and death rates

#### Sustain Health and wellness

Focus on accessibility of ART. The main focus being the decentralization of ART at PHC levels with NIMART as the corner stone of PHC ART accessibility. There are challenges with recruitment of roving teams especially Medical Officers. In 2011/12 there were 23 688 adult and 2 112 children on ART, the targets for 2012/2013 are 37 688 adults and 3112children respectively. The target however for 2013/ 2014 is to have 16 500 and 1728 new clients enrolled on ART. 2012/2013 was 45 884. This strategy involved the Care of the infected and the affected in collaboration with Department of Social Department in caring of the Orphans and the Vulnerable children and the Child Headed Households as well as Department of Agriculture for food security programs. The use of Sukuma Sakhe Strategy is a vehicle that has enabled to identify and formulate operational responses guided by needs as identified at household level. This will help to identify and support people on ARV,s and limit number of defaulters The Partnerships within the district with Local NGO's like TB Care Association and others have strengthen the Comprehensive HIV and AIDS Management . The up skilling of the Community Care Givers who are the foot soldiers in Primary Health Care and the use of TB defaulter tracer teams strengthen the program on compliance and reduce the treatment defaulter rate.

The TB HIV integration rate has increased tremendously with increase of HIV patients screened for TB vice versa.

**Co-ordination, Management, Monitoring and Evaluation, Research and Surveillance.** The DAC, LAC and WAC(war room coordinator) and the District Research Committee are functional within the district to coordinate these processes. Data management has received support from the TBHIV Care through presence of onsite Professional Nurse Counselors', data capturers, Community Health Facilitators and Operational Managers/ Mentors that were recruited by TBHIV Care has been rolled out in the district with the assistance of the NGO partner TB HIV Care by recruiting data captures and additional computers. Tier.net will strengthen the District ART Monitoring and Evaluation processes.

**Human's Rights.** This strategy has and will be strengthen by the stigmatization campaigns that are conducted by local NGO's like Edzimkhulu and the training of the Support groups that are being conducted from time to time. The Functioning of District AIDS Council has assisted in the mobilization of Local AIDS Councils which in return has taken the programs to the households/ local levels.

## STRATEGIC CHALLENGES

#### **Prevention of new infections**

- STI partner treatment is still a challenge, cannot trace where they access their treatment, but not at PHC facilities
- Condom distribution rate remains low.
- Low MMC coverage traditional practises at UMzimkhulu and Kokstad has had negative impact in achieving targets
- Delay in the installation of electricity and water at Bulwer HTA .

## HEALTH AND WELLNESS

- Staff recruitment and retention result in NIMART initiation being slow.
- Infra structural challenges in some facilities

- Poor ART follow up, especially at Greater Kokstad where there is a challenge of cross border influx
- Recruitment of Roving teams remains a challenge

## **Monitoring and Evaluation**

- Challenges with the rolling out of tier.net: space, staffing, equipment and support.
- Data management challenges

Human resource remains a big challenge even within the program management itself.

## 2013/14 STRATEGIES AND ACTIVITIES

- Improve condom availability of non- medical condom distribution sites to grey areas e.g. taverns, garages, taxi rank etc.
- Increase the uptake of people who tested positive during the HCT campaign for ART start by follow ups.
- Sustain community outreach HCT campaign.
- Train more CCG's on HIV counseling.
- Recruitment of HTA staff for Bulwer taxi rank.
- Involvement of War room staff in patients' treatment plan to reduce defaulter rate.
- Fast track all positive pregnant women to start ART in order to prevent MTCT, child and perinatal mortality.
- Training of more nurses on NIMART
- Fast tracking of all positive TB patients with CD4 below 350 to start ART.
- Tracing of contact of a sputa positive patients including less than 5 years.
- Initiate IPT to all eligible patients
- Recruit MMC Roving teams per sub district
- Active identification and tracking of ART eligible clients through Sukuma Sakhe intervention

## **TB Program overview**

Sisonke has shown marked improvement in TB programme from 68.8% in 2010 to 68 .2% for 2011 for three quarters.

The District smear conversion at 2 months from 60 .7% in 2011 to 71.8% for 2012.

This could be attributed to the involvement of NGOs and Operation Sukuma Sakhe strategy. With the use of Family and School Health teams further improvement is expected.

Greater Kokstad continue to experience challenges for clients who come for treatment initiation and go back to their respective homes especially clients from Eastern Cape. Thus most of the clients are lost as they can no longer be traced.

The Gene Expert has speed up diagnosis of MDR clients, thus clients are getting treatment earlier, last Quarter we had 49 cumulative since?

St Margaret Hospital started to initiate MDR Treatment on the 16 of April 2012, now the cumulative total of ever initiated is 100 clients.

At Ingwe sub district there is a pilot site for TB management under PHC Re engineering policy which was sponsored by supporting NGO TB /HIV Care.

It started in September 2011 focusing on improving TB cure rate CCG, s are doing mapping in their respective areas in ward 10 and profiling household. They are involved in community dialogues and also Monitoring growth to under 1 year children by promoting use of waist strings. TB cure rate for the Pholela CHC and satellite clinics has improved from 73% to 90% and the pilot will be rolled to the entire sub district.

## STRATEGIC CHALLENGES

- Delay in recruitment process by H.R.
- Staff turnover due to non-standardization of rural allowance with neighbouring District UGu as a rural node.
- Road infrastructure, we cannot access clients especially when it is raining, because of topography of the rural district.
- Households are far apart challenging the injection team to reach all clients per day.
- Communication to reach clients and facilities is still a problem due to cables theft and limited network reception.
- Cross boundary issues clients are lost to follow up because Eastern Cape is also facing the roads and network challenges.
- The Gene Expert diagnostic machine are failing to process high numbers of sputum specimens during campaigns, NHLS is aware.

## 2013/14 STRATEGIES AND ACTIVITIES

## STRATEGIES

- Integration of TB. Programme with all other Primary Health Care services.
- Screen all PHC and admitted clients for T.B.
- EAP to strengthen periodical check-up of all staff.
- Use IMCI (comprehensive) checklist to well and sick children.
- Initiate INH Prophylaxis according to guidelines.

- Intensify Initiation of ART according to guidelines, by NIMART nurses.
- Intensify case finding and community awareness's in partnership with NGOs, Operation Sukuma Sakhe stakeholders, Family and School Health teams.

# **Municipal Health Services**

Municipal Health Services previously known as Environmental Health is one of the functions of district municipalities in terms of the Municipal Structures Act (Act 117 of 1998)

The Sisonke District municipality is currently performing the Municipal Health Services function subsequent to the transfer of the same from all the local municipalities that were providing the function in July 2005.

The transfer of municipal health services from province to district municipalities and metros has been a mammoth task due to fact that, it was not clear as where funding for the services will come from. One other challenge was the issue of conditions of service which are not similar between local government and province.

Lately, it has been indicated by the provincial department of health that, funding for municipal health services is included in the equitable share that municipalities receive from national treasury but the challenge is that, such funds are not ring fenced in the division of revenue act (DORA), which makes it very difficult to ascertain as to how much funding is provided for municipal health each year. It is therefore very important for the municipality to make sure that, on allocation of the equitable share, for the municipal health service is also allocated an amount of budget that will ensure efficacy in the provision of the service.

Given all challenges regarding the transfer of municipal health services from the province to the districts, the Sisonke district municipality has transferred successfully the service from province to the district municipality on the 01 September 2012. Five (5) employees with other assets were transferred. Currently the municipality is awaiting the transfer of two vehicles which are also undergoing the process of being transferred since such vehicles must be deregistered from health KZN province and thereafter be registered with the district municipality. The KZN department of transport is actually responsible to oversee the de-registration and re-registration process in consultation with the municipality.

Although, the municipal health services function has been transferred to the district municipality, the provincial department of health is still responsible for monitoring and evaluation of the provision of the service by metros and district municipalities.

Altogether the district municipality has got seven (7) Environmental Health Practitioners. In terms of the census report 2011, Sisonke district municipality has a total population of four hundred and sixty one thousand, four hundred and twenty (461420). In terms of the World Health Organization ratio versus population, it is (1:10000) people, which means based on this norm, Sisonke still need thirty nine (39) Environmental Health Practitioners. The South African norm is (1:15000)

people, which therefore imply that, Sisonke still need twenty three (23) Environmental Health Practitioners. It is very important for the district to strive to meet this standard for purposes of ensuring that, there is efficacy in provision of MHS service. This calls for a better share of the slice of cake for Municipal Health Services in terms of the distribution of the equitable share. Such better allocation will further grow the service which is very paramount on diseases prevention and thus regarded as a first line defense.

## CONTRIBUTION TO CURB CLIMATE CHANGE

As part of the municipality's initiative to contribute in minimizing carbon foot prints, and thus contributing to curb the negative impact of climate change has a program/ project that encourages local municipalities to go green and such project is called the Greenest Municipality Competition. It involves putting measures in place that will ensure proper waste management, greening and beautifying the small towns within the area of jurisdiction of Sisonke District Municipality. In each and every year a competition is held to identify the best local municipalities.

## AUTHORIZATION TO ENFORCE THE FOODSTUFFS, COSMETICS AND DISINFACTANT ACT

The Sisonke District Municipality is authorized to implement the above act in terms of Government Gazette No 953 of 29 September 2006.

## ESTABLISHEMENT OF DISTRICT HEALTH COUNCIL

The municipality in line with section 31 of the Health Act is in a process of establishing the above structure to:

- Promote co-operative governance
- Ensure coordination of planning, budgeting, provisioning and monitoring of all health services that affect residents of the district
- To advise council on any matter regarding health or health services in the district

# Water quality monitoring

## **Definition:**

Monitoring and surveillance of water quality and availability that is intended for human consumption, recreational and industrial use.

## **Functional areas:**

- Domestic water supply.
- Storm water.
- Boreholes
- Wells

- Recreational water, public facilities such as swimming pools, water slides, spa-baths, whirlpools and wading pools.
- Lakes, dams, springs and watercourses.
- Rivers and streams not regulated by DWAF.

# **Functional activities:**

- Ensuring a hygienically safe and adequate supply of potable water provision.
- Respond to consumer complaints on contamination/impurities.
- Water sampling and testing for bacteriological and chemical analysis.
- Enforcement of laws and regulations related to water quality.
- Protection of water sources.
- Mapping of water sources in relation to pollution and contamination.
- Implement health, hygiene and awareness and education campaigns.
- Monitoring of water reticulation systems and other sources of water supply.
- Monitoring and control of storm water runoff from premises, which may impact on public health.
- Identification and making safe of dangerous wells, boreholes and excavations.

## **Food control**

## Definition

Food Control is described by the World Health Organization (WHO) as a mandatory regulatory activity of enforcement by National or Local authorities to provide consumer protection and ensure that <u>all</u> foods during production, handling, storage, processing and distribution are safe, wholesome and for human consumption; conform to quality and safety requirements and are honestly and accurately labeled as prescribed by law.

## **Formal premises**

- Food retailers (restaurants, cafes, franchises, fast-food outlets, bakeries, supermarkets, butcheries, cafeterias, etc.).
- Food wholesalers/distributors.
- Food factories/industries (including homes).
- Food warehouses.
- Catering organizations/companies.
- Food transportation.
- Food preparation areas in accommodation establishments and places of care.
- Temporary carnivals, fetes, charity and sporting/special events.
- Open air markets.
- Food tenders.

# **Informal premises**

- Vendors.
- Hawkers.

# **Functional activities**

- Investigate all food quality and safety related complaints received from consumers and appropriate remedial measures.
- Present food safety related education/training programs and conduct community developments programs for, inter alia, food handlers (formal and informal sector), schools, industry, consumers, etc.
- Implement measures for the recall and/or condemnation and proper disposal of foodstuffs unfit, unwholesome for human consumption in accordance with applicable legislative procedures.
- Carry out routine inspections of food handling establishments (premises) and of foodstuffs covered by the relevant legislation.
- Investigate outbreaks/incidences of food borne diseases (infections and poisonings) and introduce appropriate preventative and remedial control measures.
- Scrutinizing/reviewing of construction/building plans of new or remodeled food establishments followed by inspections to ensure compliance with appropriate laws and regulations.
- Enforcement of the food related provisions of the Foodstuffs, Cosmetics and Disinfectants Act, 1972 9Act No: 54 of 1972) and Regulations.
- Enforcement of the food hygiene and safety related provisions of the Health Act, 1977 (Act No: 63 of 1977) and Regulations.
- Implement control programs for specific high risks foodstuffs, such as milk, meat, eggs, seafood and prepared foods, including street foods.
- Implement National and Local food monitoring and sampling programs with specific reference to Routine Food Safety Monitoring Program, Primary School Nutrition Program and Food Fortification Program.
- Taking of histological, bacteriological and chemical samples for analysis in terms of the Free Quota Sample.
- Promote the utilization of the HACCP and other quality assurance management systems aimed at enhancing food safety within the food industry.
- Provide information and advice to consumers, industry and other Departments and health workers on all food safety related matters.
- Support industry with regard to the health certification of consignments of foodstuffs destined for export and with special monitoring programs implemented by approved certifying authorities (Agriculture, SABS, etc) aimed at promoting the export of foodstuffs to other countries.
- Ensure effective inter and intra-sectoral cooperation with other competent food control authorities, such as Department of Agriculture, SABS, PPECB, etc, and other components within the health system such as nutrition, primary health care services, communicable diseases control, health promotion, etc.

- Implement an appropriate food control program management information system as part of a national information system for environmental health services.
- Issuing of certificate of acceptability in terms of Regulations R918.
- Monitoring and control of hawkers and street vendors.
- Enforcement and compliance of Tobacco Control Legislation.
- Monitoring, control, restriction or prohibition of foodstuffs in the handling, processing, production, manufacturing, packing, transportation, storing, preparation, displaying, sale or serving.
- Law enforcement by issuing of notices/summons.

# Waste management

# Definition

Monitoring of waste management systems-refuse, health care waste, hazardous waste and sewage.

## Functional areas:

- Health care waste: Health care risk waste (medical waste).
- Hazardous waste.
- Commercial waste.
- Agricultural waste.
- Incinerator waste.
- Building rubble.
- Landfill, transfer and recycling sites.
- Garden Refuse.
- Water and sewerage works.
- Recreational waste.

## **Functional activities**

- Complaint investigations and inspections on any activities relating to waste or any product resulting thereof.
- Ensuring proper refuse disposal.
- Sampling and analysis of any waste or product (sewage, rubbish or other waste).
- Advocacy on sanitation.
- Ensuring proper handling, storage, collection, treatment and disposal of health care waste and hazardous waste.
- Improve and control the handling and disposal of animal tissue.
- Ensuring that waste is stored, collected, removed and disposed off effectively and efficiently and that proper facilities and containers are provided.

- Compliance monitoring of garden refuse sites, refuse transfer sites, landfill sites, incinerators, recycling sites, sewerage and water works and the processes associated with such premises and instituting remedial and preventative measures.
- Law enforcement by issuing of notices/summons.

# Health surveillance of premises

## **Definition:**

The identification, monitoring and evaluation of health risks, nuisances and hazards and instituting remedial and preventative measures

## **Functional areas:**

- Agricultural holdings/farms.
- Dwellings: Informal
- Keeping of animal
- Public conveniences/Public bath houses.
- Construction sites
- Informal trade: Non-food.
- Sport and recreational facilities/amenities.
- Places of entertainment/amusement centers.
- Pharmacies/chemists.
- Business centers and offices including government offices.
- Businesses.
- Industrial/manufacturing.
- Workshops
- Places of worship.
- Accommodation establishments.
- Medical practices.
- Veterinary services.
- Sanitary facilities.
- Offensive trades.
- Hairdressing, beauty and cosmetology services.
- Second hand goods shops.
- Dry cleaning and laundry establishments.
- Swimming pools and spa-baths.
- Academic institutions: Colleges/Universities/Training institutions.
- Caravan parks, camping sites and holiday resorts.

- Laboratories.
- Private and government (Public) schools.
- Places of care:
- Childcare services (crèches, nurseries, day care, after school care, child minders, and pre-schools).
- Old age homes, medi-care centers, day care centers.
- Orphanages.
- Mental institution.
- Homes for the destitute.
- Homes for refugees.
- Homes for the disables.
- Hospices.
- Clinics, community health centers, hospitals.
- Nursing homes.
- Prisons and police stations.
- Places of safe keeping
- Street children shelters.
- Hotels/motels/boarding houses.

# **Functional activities:**

- Complaint investigations relating to environmental health conditions.
- Giving advice on legal requirements for the establishments of premises as and when required.
- Compliance monitoring in terms of legislative requirements and provisions and instituting remedial and preventative measures.
- Identification of health risks, nuisances and hazards and instituting remedial and preventative measures.
- Identification, monitoring and control of overcrowding where applicable.
- Monitoring indoor air quality, ventilation, lighting and dampness and instituting remedial and preventative measures.
- Monitoring and control of sanitary and ablution facilities.
- Monitoring and control of pests.
- Enforcements of Tobacco control legislation.
- Removal of health nuisances/hazards at the cost of the owner upon failure to comply with the requirements of compliance notices.
- Scrutinizing of building plans from a health point of view.
- Identifying occupational health and safety risks and hazards and referring to Department of Labour and/or instituting remedial and preventative measures.
- Issuing of certificates of acceptability and health certificates where applicable.
- Law enforcement by issuing of notices/summons.

# Surveillance and prevention of communicable diseases, excluding immunization

## **Definition:**

The identification, monitoring and prevention of any disease which can be communicated directly or indirectly from any animal or through any agent to any person or from any person suffering there from or who is a carrier to any other person.

# **Functional areas:**

As per the Schedule of Notifiable Medical Conditions

## **Functional activities:**

- Health and hygiene promotion in prevention of communicable diseases.
- Complaint investigation and follow ups of bacterial, viral and parasitic infections.
- Case investigations and reporting
- Determination of sources of infection, contacts and carriers of diseases.
- Provision of consultation on prevention and control of diseases.
- Collection of appropriate epidemiological information on communicable diseases.
- Collaboration with other stakeholders and Departments regarding outbreaks.
- Taking of samples and specimens for analysis and further action if deemed necessary.
- Instituting remedial and preventative measures including health education.

# **Vector control**

## **Definition:**

Monitoring, identification, evaluation and prevention of vectors

- Functional areas:
- Rodents.
- Insects.
- Pests

## **Functional Activities:**

- Complaint investigations relating to environmental health conditions.
- Identification of vectors, their habitats and breeding places and instituting remedial and preventative measures.
- Carrying out of routine surveillance actions and surveys to determine the prevalence of vectors.
- Applications/instituting of eradication/control measures such as spraying of premises, baiting, fumigation, application of pesticides and placing of traps at properties/premises.
- Removal or remedying of conditions permitting or favoring the prevalence or increase of rodents, insects and vectors.
- Monitoring of high-risk areas.
- Law enforcement by issuing notices/summons.
- Community awareness campaigns on zoonotic diseases and control thereof by education and training.
  - Collection and analysis of specimens.

# Environmental pollution control

## **Definition:**

The identification, evaluation, monitoring and prevention of land, soil, noise, water and air pollution.

### **Functional areas:**

- Noise Pollution:
- Factories, industries, formal premises, musical instruments, construction sites, machineries, etc.
- Air Pollution:
- Industrial boilers, incinerators, stoves, fireplaces, refuse burning, etc.
- Land/Soil Pollution:
- Landfill/dumping and burning of waste, farming, mining, factories, etc.
- Water Pollution:
- Mining and mining activities, industrial wastewater, municipal wastewater, agricultural wastewater, unprotected landfill sites, illegal dumping, etc.

# **Functional activities:**

### Noise pollution control:

- Complaint investigation relating to environmental health conditions.
- Identification and monitoring of sources and agents of noise pollution and instituting remedial or preventative measures.
- Measuring of ambient sound levels and noise levels.
- Outdoor and indoor measurements on a piece of land and in a room or enclosed space respectively.
- Law enforcement by issuing of notices/summons.

### *Air* pollution control:

- Complaint investigation relating to environmental health conditions.
- Identification and monitoring of premises to ensure that no health nuisances, risks or hazards occur and instituting of corrective measures where such nuisances, risks or hazards occur.
- Monitoring and control of legal/illegal dumping, littering and burning of waste.
- Law enforcements by issuing notices/summons.

### Water pollution:

- Complaint investigations relating to environmental health conditions.
- Identification and monitoring of sources of water pollution and instituting remedial or preventative measures.

- Taking of water samples, including effluent and sludge samples.
- Ensuring proper systems are in place for the disposal and containment of waste water.
- Ensuring that sewerage and industrial effluents are disposed of in terms of legal requirements and that no blockages and spills occur and instituting remedial and preventative measures.
- Liaison with DWAF, GDACE and other relevant stakeholders on matters relating to water pollution.

# Disposal of dead

# **Definition:**

Compliance, monitoring of funeral undertakers, mortuaries, embalmers, crematoria, graves and cemeteries and to manage control and monitor exhumations and reburial or disposal of human remains.

# **Functional areas:**

- Funeral undertakers.
- Mortuaries.
- Embalmers.
- Crematoria.
- Graves.
- Cemeteries.

# Functional activities:

- Control, restrict or prohibit:
- The business of a funeral undertaker or embalmer.
- Mortuaries and other places or facilities for the storage of dead bodies.
- Treatment, removal or transport of dead bodies.
- Regulating, control and prohibition of graves, cemeteries, crematoria and other facilities for the disposal of dead bodies.
- Manage and control exhumation and reburial or disposal of human remains.
- Ensure compliance with health, hygiene and structural requirements and standards for such premises.
- Enforcement of laws and regulations relating to these premises via. Notices/summons.

# Key delivery programs

The Sisonke District Municipality has developed and approved a health and hygiene strategy which is in line with the National Health and Hygiene Education Strategy which identifies about four delivery programs necessary for proper implementation of the health and hygiene education strategy and they are as follows:

On-going Health and Hygiene Education Project Based Health and Hygiene Education Health and Hygiene Education during an Emergency Health and Hygiene Education at Schools

# On-going health and hygiene education

It is a known fact that, for any program to be fully absorbed by the intended audience and /or group, it needs to repeatedly emphasized. This will therefore gel very well with the provision of municipal health services by the district municipality. The municipal health services unit conducts health and hygiene education on monthly basis regardless of whether where sanitation and water projects have been implemented. This has proved to be a success in the sense that, diseases associated with waterborne and poor sanitation have decreased. Though there is a lot of improvement in people's behaviour but on-going health and hygiene still need to be conducted intensively and making sure all the corners within the district are covered.

# Projects based on health and hygiene education

Health and Hygiene Education forms part of provision of houses by the department of human settlement as coordinated from local municipalities. It as well forms an integral part of sanitation and water provision projects at a district level. This therefore suggests that, there should be a link amongst the spheres of government to ensure that health and hygiene education is conducted at all levels prior, during and after the implementation of projects.

# Health and hygiene education during emergency

Disease outbreaks occur when they are least expected. It is therefore very crucial to contingency plans in place that will give direction and guidance during an emergency. The Sisonke district municipality has made an undertaking that, each and every department within the municipality should be represented in the Disaster Management Advisory Forum for the purposes of coordination of all emergency issues for that particular department.

This allows the departments to always be alert of risks that they face and how they can deal with them. During an outbreak and/ or an emergency situation, a Joint Operation Centre shall be activated and all relevant role players shall be engaged to deal with the situation at hand as required by the Disaster Management Act (Act 57 of 2002).

# Health and hygiene education at schools

It is very crucial for the nation to understand that installing health and hygiene education at schools, can produce a generation that is very conscious about issues of health and hygiene. This therefore will enable a very healthy environment with people that take personal hygiene very serious, improving healthy life styles.

For this program to be a success at schools, the department of education has to be engaged for them to be in a position to roll out such a program.

Such initiatives have to be informed by the budget as well in order to have material and resources to roll out this program at schools. Rolling out of such programs at schools can also be intensified by regular visits of health officials to schools as a support program to the schools.

The following issues may be taught to schools as part of health and hygiene issues:

- The importance of personal hygiene on children
- The importance of litter collection at schools
- The importance of water conservation
- Involvement of schools on clean-up campaigns as part of promoting healthy environment.

# Project based health and hygiene education implementation plan

The project based health and hygiene education is primarily vested with the water services authority in Sisonke District Municipality, due to the fact that water and sanitation is within their jurisdiction. For the purposes of ensuring sustainability of health and hygiene education even after the projects, it is very crucial that, the municipal health services be as well kept abreast of such projects.

# 5.2.4 Safety and Security

Crime is a serious issue in the District with assault, burglary and stock theft being the most prevalent. Stock theft is prevalent in the KwaSani Municipal area, Umzimkhulu Municipality and the Drakensberg in the KwaSani Local Municipality, both areas forming the border of Sisonke District Municipality and Lesotho. To deal with stock theft the Sisonke District Municipality undertook to engage SANDF, SAPS and Community members.

Another crime that has been reported to be disturbing on the farm areas is one of "pot theft" whereby people kill an animal on the spot and cut it up for taking there and then. The District police service has indicated that these crimes are committed mostly by the youth. It has also been highlighted that alcohol abuse is the main driving force behind the crimes committed in the area. As in most cases, it could be safe to assume that the crime status of the area is related to the socio-economic condition of that area. The District does not fall far from this truth. Lack of employment and thus poor economic situation, coupled by the minimal recreation activities for the youth, could be a contributing factor in the crimes committed. It is therefore important that the District looks into such issues and develops measures that will assist in alleviating crime in the area.

| DISTRIBUTION OF POLICE STATIONS WITHIN THE DISTRICT |                              |                                    |
|---|------------------------------|------------------------------------|
| Local Municipality                                  | Number of Police<br>Stations | Names of Police Stations           |
| Ingwe Municipality                                  | 3                            | Bulwer, Creighton and Donnybrook   |
| UBuhlebezwe<br>Municipality                         | 2                            | Ixopo and Highflats                |
| Kwa-Sani Municipality                               | 3                            | Himeville, Bushmansnek and Lotheni |

|---------------------------------|---|--|
| uMzimkhulu Municipality         | 4 | UMzimkhulu, Ibisi and Ntsikeni and Gowan-Lea |

# 5.2.5 Nation building and Social Cohesion

Sisonke District Municipality arguably boasts the most diverse community in terms of culture and languages in the province; however our languages and cultures must be revived and protected against extinction. Also various cultural events, competitions and festivals are held in Sisonke District Municipality showcasing cultural diversity of the area. Department of Arts and Culture and local municipality are amongst the role players engaged by the municipality to promote language and cultural diversity. Continuous cultural activities such as poetries, music, dance and awareness campaigns are held to alert and sustain diversity.

# 5.2.6 Community Development

# 5.2.6.1 Youth Development

In terms of the statistics released by the Statistics South Africa for 2011 Census, the majority of our national, provincial and district population is youth. A number of studies undertaken indicate that the youth of our country is the most hard-hit by unemployment, lack of skills, and are also vulnerable to social ills facing our country. Despite many other initiatives by different government departments and other partners, the youth is still facing major challenges. Breaking the cycle of poverty and increasing opportunities for youth to participate fully and meaningfully in the social, political and economic life of our society, remain a challenge for the country.

A Framework is therefore needed that seeks to provide guidance on the design and implementation of youth development programmes at the local government level. This will assist in ensuring that the municipal programs are aligned to the challenges faced by our youth and such programs should be sustainable.

Factors such as rapid urbanization, unbundling of household as well as the impact of HIV and AIDS have compounded problems faced by youth. Notwithstanding the above, over the last decade young people have increasingly become involved in activities involving their development. Amongst challenges in the implementation of youth development programmes are:

- a lack of integration within and across departments;
- > a lack of adequate resources to deliver on the development mandate in general and youth development mandate in particular;
- a lack of skills amongst the youth in particular to enable them to initiate their own development activities beyond once-off activities;
- > lack of clearly identified youth development indicators and outcomes in cross-cutting programmes;
- lack of communication on available resources and programmes for youth;
- > lack of monitoring and evaluation tools reflective of focused interventions for youth and other target groups; and

> limited documentation and sharing of best practices on youth development.

In the State of the Nation Address (SONA 2013), the President of South Africa, identified youth development as one of the core issues for attention by government departments. The SONA highlights the following areas of focus in relation to youth development

- Just over a third of the population is under the age of 15. Our country, like many others, has a crisis of youth unemployment.
- > NEDLAC to discuss youth employment incentives.
- > The incentives will add to what Government is already doing to empower the youth.
- > State owned companies provide apprenticeships and learnerships and the need to accelerate the program.
- The Department of Rural Development and Land Reform runs the National Rural Youth Services Corps, which has enrolled 11 740 young people in various training programmes.
- The plan by the Department to roll out nine Rural Youth Hubs per province, including in the 23 poorest districts in the country.
- The use of the Expanded Public Works Programme and the Community Work programme by the State to absorb young people.

In attempt to development a clear plan on youth development, the municipality will prioritize Youth Development and Empowerment Plan that will provide a framework within which the municipality will be developing its youth. The pillars of such a plan will be:

- Providing training and capacity building
- All departments to the part of the plan. This will ensure that they do incorporate youth development into their departmental plans;
- Engagement with the private sector, State-owned Enterprises (SOEs) and donors;
- Functional and effective institutional arrangements;
- > Establishment of Multi-sectoral Youth Forums and enabled to function effectively at local level.
- Youth Forums;
- > Municipal budgeting for youth development is critical.

### District Municipalities' specific roles and responsibilities

- > Ensuring that youth issues are effectively mainstreamed in the district IDP; and
- > Co-ordinating the process of engagement between partners in their activities to support youth.

### Local Municipalities' specific roles and responsibilities

- Co-ordinating community-level processes in respect of youth development and service delivery; and
- Ensuring that participation mechanisms are sufficiently accessible and sufficiently proactive to enable the participation of youth in governance, planning, service delivery and monitoring.

#### **Roles of Traditional Leadership Structures**

Traditional Leadership in South Africa is institutionalized through the Traditional Leadership and Governance Framework Act of 2003 (TLGFA) and the Communal Land Rights Act of 2004 (CLRA). One of their roles is to promote socio-economic development, peace, social cohesion and the preservation of the moral fibre of society. Further, they have a responsibility to preserve culture and tradition of communities and to contribute to nation building. All of this has an impact on youth and youth development. A stable and prosperous society is one which values culture in its diversity and thrives to promote moral values. Through their structures, forums and activities, Traditional Leadership has a role to create opportunities for youth participation as well as to champion youth development. It is through such structures and activities that Traditional Leadership can pass on cultural traditions and customs to the younger generation.

#### 5.2.6.2 Development of people with Disability

The Sisonke District Municipality recognizes and respects the rights of the disabled. People with disabilities were marginalized; abused and disrespected as a result they are still not sufficiently represented in government and in other community structures. Some do not have access to education as a result of lack of special schools within the district. The municipality seeks to address this through engagement of Department of Education, Premier's Office and Social Development. The municipality has human resource policies to ensure that the disabled have access to employment. Workshops for the disabled are also held continuously within the district.

The Sisonke District Municipality has established a Disabled Forum as measure to address this challenge. This forum meets quarterly to discuss issues affecting the disabled. Sisonke District Municipality, Social Development, Department of Health and Local municipalities held a disabled day once a year in November, where all government Departments are represented in order to tell them about their programmes. They also participate in a disability parliament as delegates where they share their ideas with the provincial people.

#### Successes

The special programmes office has managed:

- To launch the following forums
  - o Disability forum
  - Men Sector forum
  - o Cultural forum
  - o Senior Citizens forum
  - Gender Machinery Committee
- To get the different talents through cultural festivals and competitions, such other groups who have become national artists like
  - o Ichwane lebhaca Maskandi group from Ubuhlebezwe
  - Inyon'emhlophe Maskandi group from Ubuhlebezwe
  - Home boys Isicathamiya group from Umzimkhulu

- Vukayibambe Indlamu group from Ubuhlebezwe
- Some of the senior citizens were selected to participate in the National Golden games , in 2011 and in 2012.
- To commemorate the International days, at district level and participate at national level like International Disabled Day, Women's day, Senior citizens month.
- To convince some of our local municipalities to employ their disability coordinators

### Challenges

The Special programmes unit is also facing the following challenges:-

- Lack of enough financial resources.
- Minimal awareness campaigns to engage special groups on issues affecting them.
- Wednesday was launched as the golden Wednesday whereby all the senior citizens are encouraged to play in their areas. Sisonke does not have enough money to visit the different areas, encouraging the senior citizens to participate in sport.

The Sisonke District Municipality recognizes and respects the rights of the disabled. People with disabilities are marginalized; abused and disrespected as a result they are not sufficiently represented in government and other community structures. Some do not have access to education as result of lack of special schools within the district. The municipality seeks to address this through engagement of Department of Education, Premier's Office and Social Development. The municipality has human resource policies to ensure that the disabled have access to employment. Workshops for the disabled are also held continuously within the district.

The Sisonke District Municipality has established a Disabled Forum as measure to address this challenge. This forum meets quarterly to discuss issues affecting the disabled. Sisonke District Municipality, Social Development, Department of Health and Local municipalities held a disabled day in Vulekani Special School, where wheelchairs were donated to the disabled attending the school. The Sisonke District Municipality will endeavor to give unwavering support to this special school in 2013/14 and years beyond.

### 5.2.6.3 Women / Gender Issues

Sisonke District Municipality is a predominantly rural municipality and characterized by high illiteracy rate, lack of skills and poverty. Most affected by this are women who historically were left at home to look after children and not attend school or work. The municipality then has a mammoth task of relieving women from the dependency mindset and the deprivation trap. Women are not fully represented in all government structures and other non-governmental structures within the District. There is also a lack of economic empowerment of women. Notwithstanding these challenges, the municipality in conjunction with government departments does have adhoc capacity building workshops for women which are not enough considering magnitude of this challenge. Amongst other things the municipality has the remedial measures in place to address this challenge: Learnership program, Human Resources Development Strategy, skills development plan. Awareness campaigns and workshop on women and gender issues also form integral part of our strategy.

All the above is aimed at ensuring recruitment of women and capacity building initiatives. Sisonke District Municipality and Agricultural department will support women initiatives through assisting women projects, etc

### 5.2.6.4 People affected by HIV and AIDS

HIV/AIDS pandemic is prevalent in the whole world and statistics clearly show that KwaZulu Natal province has the most number of people infected and affected by HIV /AIDS in the republic and Sisonke District Municipality is no exception. Sisonke District Municipality has already begun to take active steps to ensure that alarming rate of infection is kept at a very minimal level. This is done through collaborative efforts with government departments, CBOs, NGOs and other concerned organizations and departments. This collaboration is intended to lead to the formalization of a District Wide HIV/AIDS Council. This council will be the principal body that will deal with HIV/AIDS issues. In the meantime the municipality in conjunction with Government departments organizes HIV/ AIDS awareness campaigns within the district. Furthermore the municipality will participate in programmes to assist HIV/AIDS infected people with the formation of support groups since the municipality has been inundated with such need from the community. Also, acknowledging that municipal employees are not immune to the pandemic hence the intention is that we have a special programmes unit to give attention to these issues.

### 5.2.6.5 Children

The office on the Rights of the Child (ORC) within the Human Rights Chief Directorate, situated under the auspices of the Kwazulu-Natal office of the Premier, is a Presidential Initiative which is constitutionally mandated. It has the following core functions:

- To promote and enable the realization of the child's rights to survival, development .protection and participation in Kwazulu-Natal.
- To monitor and evaluate service delivery on children's issues in the Province.
- Analyze policy, conduct research and mainstream the children's rights in all spheres of Government.
- To advocate and lobby for children's rights in the Province.
- To do capacity building on children's rights issues.
- To co-ordinate all activities and programs pertaining to children's rights.
- To encourage the communities to do what is in the best interest of the children.

Section 152 of Chapter 7 of the constitution of South Africa sets out the objectives of Local Government. From a Child Rights Perspective, democracy is also for children as children are part of the local communities.

Services to our communities must meet children's needs and promote their well being. Children are the future of our communities. Children need to be safe, need shelter, Health Care and clean water. Children need to have a voice and have a right to be heard when expressing their thoughts feelings, and ideas within their Communities.

Section 153 of the Constitution sets out the Developmental duties of Municipalities, which is to structure and manage its administration giving priority to the basic needs of the communities where adults and children exist.

The National Children's Rights Co-ordination Framework consists of the National Children's Rights Advisory Council and Technical Committees with the Office on the Rights of the Child within Presidency.

Provincially, Children's Rights issues are attended to within the Office on the Rights of the Child, Provincial Advisory Councils and Technical Teams (KPACC). KPACC has the function of monitoring and mainstreaming Children's Rights.

Districts and Local Municipalities have an obligation to form structures that will attend to Children's Rights. e.g. DACC and LACC. (District Advisory Council for Children and Local Advisory Council for Children) in accordance with the National Children's Rights co-coordinating Framework.

The District attends to the obligation towards Children's Rights by working closely with the Department of Education and the Department of Welfare. Back to Schools Campaigns, School Visits and events such as taking the Girl Child to Work have been conducted successfully. Food parcels have been distributed at Schools.

### 5.2.6.6 Sport and Recreation

Sport & Recreation Unit is responsible for encouraging the culture of play to the people of Sisonke District especially young people. Sport and Recreation Unit in Sisonke works in collaboration with the Provincila Department of Sport and Recreation and the Department of Education (School Sport) within the jurisdiction of Sisonke. Over the years, Sisonke District Municipality has improved on a number of sporting activities even though there is still a lack of sport facilities and non-existence of some sport federations within the District. The municipality always participate in Provincial competitions like SALGA KZN Games, Indigenous Games, Rural Horse Riding etc. and municipality displayed an improvement in some of sport codes i.e. Dance, swimming, Football, Netball, Rugby, Tennis and Cricket.

Sisonke district in conjunction with Department of Sport & Recreation hosts annual event called Sisonke Summer Cup Festival (Horse Riding) that grows gradually each and every year. The municipality is in a process of negotiating with different role stakeholders to solicit assistance where there is a challenge. Sisonke District Municipality is planning to solicit funds to construct facilities especially on sports that are predominantly played in urban areas e.g. swimming, rugby, tennis, cricket, dance-sport etc.

#### Programmes performed by the unit:

- District tournaments
- Mayoral Games
- Indigenous Games
- Horse Riding Games

# This unit is responsible for the following programmes:

- Developing Sport Councils within the District with the assistance of Department Sport & Recreation, South African Sport Council and Local Municipalities.
- Formation of Sport Clubs with the assistance of Sport Councils, federations and Local municipalities.
- To ensure that people are getting involved in a number of sporting activities.
- To identify and nurture the talent in young people.
- To assist young people in exposing their talent.
- Invite scouters during the district tournaments.

## **Challenges facing Sisonke Sport & Recreation Unit:**

- The most challenge in the District is the shortage of facilities.
- Lack of funding to support different sport codes
- Wards under the jurisdiction of Sisonke are very scattered that means all areas need to have playing facilities.
   Players are forced to travel long distances in order for them to access facilities as transportation is costly.
- No qualified Coaches within the district. Coaching courses and administrative trainings need to be convened by the relevant personnel.
- Shortage of personnel within the unit.
- Sisonke District does not have Sport Academy. Government departments i.e. Department of Education,
   Department Sport and recreation and Municipalities need to provide funding for the construction of the sport academy.
- Sisonke district does not have Sport Council. Sport Council is responsible for the development of sport and ensure the smooth running of the competitions.

# 6. Municipal Financial Viability and Management Analysis

## 6.1.1 Indigent Support (Including Free Basic Services)

- Revise the policy, and also check the threshold for indigents with the local municipality.
- Compilation of indigent register as per local municipalities.
- Employment of staff responsible for indigent.

## 6.1.2 Revenue Enhancement and protection strategies

- Introducing awareness campaigns to all water users within the district.
- Introducing the amnesty to non-payments
- Implementing credit control, and revisit the policy

# 6.1.3 Municipal Consumer debt position

- Installation of water meter restrictors.
- Reduce the flow of water to all non-payers.

## 6.1.4 Municipal Consumer Debt Position

## 6.1.5 Grants and Subsidies

# 6.1.6 Municipality Infrastructure Assets and Maintenance

With particular reference to the Infrastructural Assets, the Municipality is currently faced with a challenge of striking a balance between the allocation of financial resources towards new Water & Infrastructure assets thereby increasing accessibility to basic levels of service to the Sisonke communities and the allocation of sufficient resources towards the Repairs, Maintenance and refurbishment of the existing infrastructure.

The current status of our Water & Sanitation infrastructure status is rooted in the dilapidated water and sanitation assets which were transferred from the Local Municipalities at the time of the transfer of this municipal function to the district. The Municipality is has in its infrastructure management plan included a budget for the infrastructure conditional assessment which will then inform replacement program of the dilapidated infrastructure. However, in the 2012/13 to 2014/15 medium term expenditure framework, the municipality will receive total funding of R22, 3million from the Department of water affairs for the water & waste water treatment works refurbishment and rudimentary water supply projects. This funding will greatly improve the useful life's of the current assets while also improving the quality of the service provided.

In terms of the 3 year Capital Development Plan, the Sisonke District Municipality has budgeted for close to R700 million of new infrastructural assets.

### 6.1.7 Current and Planned Borrowings

The municipality currently has 3 long-term debt commitments in the form of two DBSA loans and one ABSA loan. The DBSA loans will be redeemed in the Medium Term Revenue & Expenditure Framework while the ABSA loan will be redeemed in 2021. The Council, in its revenue enhancement strategy and in line with the Infrastructure investment plan will in the future source funding to invest in revenue generating projects.

### 6.1.8 Municipality's Credit Rating

#### 6.1.9 Employee related costs (including councillors)

Estimated councillors and employees costs

Employees R92 694 027 Councillors R6 617 426

#### 6.1.10 Supply Chain Management

#### **Procedural issues**

- The Supply Chain Management Policy was adopted and it's currently implemented.
- Procedure manual is in place and currently implemented
- Compliance checklist have been developed and currently implemented
- Fixed Asset policy was adopted and is currently implemented
- Bid Committees are fully functional
- Procurement Plan is in place but not yet approved
- The SCM training hasn't been held

### **Components within Supply Chain Management**

Supply Chain Management has six components namely:

- Demand Management
- Acquisition Management
- Logistics Management
- Disposal Management
- Risk Management
- Performance Management

### **Demand Management**

(a) Include timely planning and management processes to ensure that all goods and services required by the municipality are quantified, budgeted for and timely and effectively delivered at the right locations and at the critical delivery dates, and are of the appropriate quality and quantity at a fair cost;

- (b) Take into account any benefits of economies of scale that may be derived in the case of acquisitions of a repetitive nature; and
- (c) Provide for the compilation of the required specifications to ensure that its needs are met.
- (d) To undertake appropriate industry analysis and research to ensure that innovations and technological benefits are maximized.

### Acquisition Management

- (a) That goods and services are procured by the municipality in accordance with authorized processes only;
- (b) That expenditure on goods and services is incurred in terms of an approved budget in terms of section 15 of the Act;
- (c) That the threshold values for the different procurement processes are complied with;
- (d) That bid documentation, evaluation and adjudication criteria, and general conditions of a contract, are in accordance with any applicable legislation;

### Logistics Management

- (a) The monitoring of spending patterns on types or classes of goods and services incorporating, where practical, the coding of items to ensure that each item has a unique number;
- (b) The setting of inventory levels that includes minimum and maximum levels and lead times wherever goods are placed in stock;
- (c) The placing of manual or electronic orders for all acquisitions other than those from petty cash;
- (d) Before payment is approved, certification by the responsible officer that the goods and services are received or rendered on time and is in accordance with the order, the general conditions of contract and specifications where applicable and that the price charged is as quoted in terms of a contract;
- (e) Regular checking to ensure that all assets including official vehicles are properly managed, appropriately maintained and only used for official purposes; and
- (f) Monitoring and review of the supply vendor performance to ensure compliance with specifications and contract conditions for particular goods or services.

### **Disposal Management**

- a) The criteria for the disposal or letting of assets, including unserviceable, redundant or obsolete assets, subject to sections 14 and 90 of the Act
- b) Disposal can be done in the following method:

(i) Transferring the asset to another organ of state in terms of a provision of the Act enabling the transfer of assets;

- (ii) Transferring the asset to another organ of state at market related value or, when appropriate, free of charge;
- (iii) Selling the asset; or
- (iv) Destroying the asset.

## **Risk Management**

Risk management include –

- (a) The identification of risks on a case-by-case basis;
- (b) The allocation of risks to the party best suited to manage such risks;
- (c) Acceptance of the cost of the risk where the cost of transferring the risk is greater than that of retaining it;
- (d) The management of risks in a pro-active manner and the provision of adequate cover for residual risks; and
- (e) The assignment of relative risks to the contracting parties through clear and unambiguous contract documentation.

### Performance Management

- a) Performance Management system involves the entire supply chain's ability to meet end-customer needs through product availability and responsive, on-time delivery.
- b) Supply chain performance crosses both functional lines

#### **MUNICIPAL ASSETS**

With particular reference to the Infrastructural Assets, the Municipality is currently faced with a challenge of striking a balance between the allocation of financial resources towards new Water & Infrastructure assets thereby increasing accessibility to basic levels of service to the Sisonke communities and the allocation of sufficient resources towards the Repairs, Maintenance and refurbishment of the existing infrastructure.

The current status of our Water & Sanitation infrastructure status is rooted in the dilapidated water and sanitation assets which were transferred from the Local Municipalities at the time of the transfer of this municipal function to the district. The Municipality is has in its infrastructure management plan included a budget for the infrastructure conditional assessment which will then inform replacement program of the dilapidated infrastructure. However, in the 2012/13 to 2014/15 medium term expenditure framework, the municipality will receive total funding of R22, 3million from the Department of water affairs for the water & waste water treatment works refurbishment and rudimentary water supply projects. This funding will greatly improve the useful life's of the current assets while also improving the quality of the service provided.

In terms of the 3 year Capital Development Plan, the Sisonke District Municipality has budgeted for close to R700 million of new infrastructural assets.

# 7. Good Governance and Public Participation Analysis

# 7.1 Good Governance Analysis

# 7.1.1 National and Provincial Programmes Rolled out

| National Initiatives                    | Provincial Initiatives   |
|---|--|
| Umzimkhulu Emergency Sewer Intervention | Reconstruction of Hope Street in Greater Kokstad<br>Municipality             |

# 7.1.6 Municipal Risk Management

The municipality does acknowledge the importance of having a fully-fledged Risk Management Unit that will assist the municipality on identifying and mitigating all the risks that may hinder services delivery. And as such Sisonke District Municipality has since developed the Risk Management strategy and a Risk Management plan which will be fully implemented as soon as the Risk Manager has been employed. The post has been advertised and it is awaiting for shortlisting and the due processes.

# 7.1.7 Municipal By-Laws

The following by-laws have been developed by the municipality:

• Municipal Health Services By-Laws which are in the process of being gazetted

# 7.2 Public Participation Analysis

| 23-Nov-12 | Greater Kokstad LM | 4         |                       |

The above table reflects the public participation meetings that were held during the month of November 2012. In order to enhance democracy the district felt it was proper that it invites the members of the community to partake in the affairs of the municipality, particularly the IDP/Budget, this is irrespective of the fact that the district does not have wards. In the spirit of Intergovernmental Relations and to minimize the costs of these road shows and to avoid duplication these road shows were conducted together with local municipalities. The following structures are also used to enhance public participation

- Council meetings
- Mayoral Izimbizo
- Print media
- Air media
- Website

# 8 Key Challenges

# SERVICE DELIVERY

| Key<br>challenge | 1. Lack of funds to implement planned projects  |
|------------------|---|
| Description      | Insufficient funds refers to the state where there is no enough cash to meet the requirements. Sisonke District Municipality relay on grants for the implementation of capital projects (Water and Sanitation). |
|                  | Water and Sanitation projects are implemented over a long period of time. This has a negative impact due to the escalation of prices in the dependant factors such the cost of labour, materials and fuels.     |

| Key<br>challenge | 1. Lack of water resources  |
|------------------|---|
| Description      | Most communities residing within the Sisonke District Municipality are facing severe wate   |
|                  | scarcity, either as a result of dried water sources (boreholes, springs) or due to a lack o |
|                  | investment in water infrastructure such as dams and reservoirs.                             |
|                  | Compared with the lengthy agenda to combat climate change, this is a very short tin         |
|                  | indeed and yet the impacts of water scarcity will be profound. However, Sisonke Distri      |
|                  | Municipality is starting to invest in sustainable and reliable water sources such as Bulw   |
|                  | Dam (Under Planning).This dam is not going to cater for the entire district more wat        |
|                  | resources are in urgent need.   |

| Key<br>challenge | 1. Provision of clean drinking water and proper sanitation facilities  |
|------------------|--|
| Description      | 40% of our population do not have access to clean drinkable water  |
|                  | Sanitation backlogs has been eradicated at Greater Kokstad LM and KwaSani LM and currently the municipality is working to eradicate sanitation backlogs in the 3 remaining municipalities, i.e Ingwe, Umzimkhulu and UBuhlebezwe |

# SPATIAL PLANNING

| Key<br>challenge | 1. Interpretation of Spatial planning and linking it to Infrastructure Planning   |
|------------------|---|
| Description      | The lack of proper planning of Sisonke towns has led to a stagnant economic growth and has  |
|                  | adversely affected the creation of employment, and this has led into modern planning that will reflect the democratic modern society. |

# LOCAL ECONOMIC AND SOCIAL DEVELOPMENT

| Key<br>challenge | 1. Growing the Economy of Sisonke District Municipality                                      |
|------------------|--|
| Description      | The district municipality needs to continuously grow the economy of the district in order to |
|                  | address issues of unemployment, poverty and inequality.                                      |

# MUNICIPAL FINANCIAL VIABLITY AND MANAGEMENT

| Key<br>challenge | 1. Operation clean audit by 2014  |  |
|------------------|---|--|
| Description      | As part of operation clean audit the municipality has to put in place system and procedures |  |
|                  | to ensure that it receives clean audit by 2014 from the auditor general.                    |  |

### **Municipal Transformation and Organisational development**

| Key<br>challenge | <ol> <li>Information and Communication Technology</li> <li>Retention and Scarce Skills Policy</li> </ol> |
|------------------|--|
| Description      | 1. Lack of ICT Strategies and Policies   |
|                  | 2. There is no retention and Scarce Skills Policy to Ensure that Scarce Skills are retained              |

# D: VISION, GOALS, OBJECTIVES AND STRATEGIES

By 2030 Sisonke will be a leading water services provider in the KZN Province with its communities benefitting from a vibrant agriculture and tourism sector.

### **Mission Statement**

Working together with its communities and stakeholders Sisonke District Municipality will ensure the provision of clean, drinkable uninterrupted water services and proper sanitation facilities and strive to improve its agriculture and tourism sectors to enhance human dignity.

### **Core Values**

- 1. Transparency
- 2. Accountability
- 3. Consultation
- 4. Commitment and
- 5. Honesty

### 7. Goals, Objectives and Strategies

| KPA | Goals                      | Objectives            | Strategies       |
|-----|----------------------------|-----------------------|------------------|
|     | Target 10 of the           | To improve the        | By implementing  |
|     | Millennium Development     | coverage, quality,    | Bulk regional    |
|     | Goals (MDGs) is to "have   | efficiency, and       | Water Supply     |
|     | by 2015 the proportion of  | sustainability of     | Schemes.         |
|     | people without             | water and sanitation  | By implementing  |
|     | sustainable access to safe | services in all urban | the localized    |
|     | drinking water and basic   | and rural             | based rural      |
|     | sanitation".               | communities           | sanitation plan. |

| Service<br>Delivery and<br>Infrastructure<br>Services | To contribute towards<br>creating 2 million full time<br>equivalent (FTE) jobs for<br>poor and unemployed<br>people in South Africa so<br>as to contribute to halving<br>unemployment by 2014,<br>through the delivery of<br>public and community<br>services. | The objectives are to<br>use existing<br>government entity<br>budgets to reduce<br>and alleviate<br>unemployment and<br>increase the ability of<br>workers to earn an<br>income, either<br>through the labour<br>market or through<br>entrepreneurial<br>activity. | EPWP 's strategy is<br>to create work<br>opportunities<br>coupled with<br>training to ensure<br>that workers gains<br>skills while they<br>work, and increase<br>their capacity to<br>earn an income in<br>the future. |
|---|--|--|--|
|   | To implement planned and<br>routine maintenance<br>programs which will<br>extend the useful life of all<br>buildings and prevent<br>premature capital outlay<br>for replacement.   | To establish the acceptable<br>use and capacity of each<br>building<br>To establish a maintenance<br>schedule for the SDM's<br>facilities.   | Through the sources of<br>external service providers<br>for so as to ensure<br>the effectiveness of<br>planned preventive<br>maintenance   |
| LED and Social<br>Development                         | To increase the Gross Domestic<br>Product of the District  | To facilitate investment and<br>promote the SMMEs to<br>form part of the economic<br>main stream especially in<br>agriculture and tourism  | By engaging all the<br>potential funders and<br>investors as well the<br>training and skilling of<br>emerging SMMEs both in<br>agriculture and tourism.  |
| Democracy and<br>Governance                           | Increased interaction between<br>the municipality and members of<br>community  | To enhance Public<br>Participation   | By engaging members of<br>the community in all the<br>municipal affairs that<br>affects their<br>lives/wellbeing.  |

# **E: STRATEGIC MAPPING AND IMPLEMENTATION PLAN**

### E.1 STRATEGIC MAPPING

### **Development and Planning unit**

The Planning and Development Unit is responsible for Municipal Planning, Environmental Planning and Geographic Information Systems.

### **Planning Administration**

The SDM has established the District Planning and Development Forum (DPDF) for the co-ordination of development processes within the district. Although Local Municipalities exercise their constitutional right in administering and processing development applications, the DPDF plays a vital role in providing support and capacity throughout the district. This support enables speedy processing of development application of proposed development. The SDM has also committed itself to the District Planning Shared Services (DPSS). The DPSS is aimed at increasing and shearing planning capacity within the district. Both the DPDF and DPSS are aimed at increasing the planning capacity within the district.

As part of improving planning administration, the SDM, CoGTA and LMs are working together towards the implementation of Application Filing and Monitoring System (AFMS). This AFMS will enable municipalities to process development applications within the specified timeframes as set out in the Planning and Development Act.

#### **Municipal and Regional Planning**

The improvement of the towns within the Sisonke District Municipality's jurisdiction is currently at the center of planner's attention, this is due to the fact that our towns are the pinnacle of economic and social activities. These nodes provide the largest proportion of employment opportunities that exists within the District. Over the past few years the Sisonke District Planning Team has been working hand in hand with local municipalities to address some of the Planning problems that are experienced in our towns.

The drive of these initiatives emanates from our spatial development framework that has indicated where the future development of the district space economy is in the context of the provincial and national space economies. This is done through:

- Basing the future development guidance on a good understanding of the existing development, its problems and opportunities.
- Providing strategic guidance for such development, including addressing issues of more appropriate distribution of economic and infrastructure development, social upliftment, environmental conservation and appropriate utilization etc.

- Ensuring appropriate structuring and linkage of development both internally and in relation to external issues and opportunities
- Providing a spatial reflection of the needs and priorities established in the IDP and addressing the specific and unique issues and opportunities within the district
- Establishing a development process and sequence leading from the present to the envisaged future development and;
- Ensuring alignment with the SDF's of the Local Municipalities within the District.

The primary and secondary nodes, as identified in the Sisonke Spatial Development framework and the PSEDS, were used to target areas of significant economic opportunities where social and economic impact would be felt the most should the infrastructure recourses be directed in those areas. The strategic location of the Ixopo town as a primary node at the intersection of two provincial roads, namely the R56 and the R612 was a logical area of investment since these roads provide Ixopo with strong north-south and east-west linkages. The second primary node within the district is Kokstad. The N2 corridor links the area of Kokstad to the major economic hubs, such as Port Shepstone and Durban in KwaZulu-Natal Province and Umtata in the Eastern Cape Province. In terms of nodal development, Kokstad Town is identified as a third order node on a provincial level, but one of the primary nodes within the district, with potential for high levels of economic development, growth and expansion.

These towns have, over the years, transformed from being a mere service centers for the surrounding farming community into a sub-regional administrative centers and economic hubs. The lack of a strategic forward planning tools to guide the growth and activities of these towns in the past has led to a number of planning issues which include the inappropriate combination of land use activities, lack of suitable land for growth and expansion of the town, congestion of vehicles and pedestrians particularly in the lower parts of Main Street, limited parking facilities, clearly defined pedestrian walkways, street furniture, building aesthetics, public open spaces and urban greening.

To circumvent a further impediment on the growth of this town the Sisonke District has funded the Ixopo Urban Renewal Programme that seeks to address the challenges faced by these towns. Both Sisonke District and Local Municipalities have worked together to develop these plans. Built into these plans is a phased approach with interrelated and, in some instances, overlapping activities that will enhance the functioning of the towns

An Urban Regeneration Plan for both Ixopo and Kokstad Towns has since been developed containing the interventions that will be executed in order to enhance the town from an economic and social perspective. For detailed planning purposes, the strategy has further broken the town into precincts which are related to the development objectives per each precinct as well as how they will be achieved. The following table lists some of the objectives of the study as well as how they will be achieved.

# 2013-2014 Final Sisonke District Municipality - IDP

| OBJECTIVES OF REGENERATION PLAN   | HOW OBJECTIVE WILL BE ACHIEVED IN THE PRECINCT  |
|---|---|
| To create an efficient spatial structure through the<br>implementation of land use measures and integration | <ul> <li>Proper and functional access &amp; movement network will be implemented.</li> <li>Congestion in Main Rd will be addressed, which will contribute to a more efficient movement framework.</li> <li>The precinct will contribute toward the expansion and regeneration of the town.</li> </ul> |
| To improve the quality of the environment, which includes the natural and man-made environment              | <ul> <li>A quality environment will be created in the precinct through urban design measures.</li> <li>The natural environment will be enhanced and form part of the integrated open space system.</li> </ul>   |
| To improve the quality of life of citizens through<br>improved access to services and facilities            | <ul> <li>Provide Quality public facilities in the precinct that is accessible and visible.</li> </ul>   |
| To promote economic development in Ixopo  | <ul> <li>Promote Economic development in precinct through private sector investment.</li> <li>Accommodate &amp; control informal traders along Main Road.</li> <li>Facilitate landmark development in precinct, such as the proposed shopping complex.</li> </ul>                                     |
| To provide satisfactory infrastructure through regular<br>upgrading and continued maintenance               | <ul> <li>The development of the precinct will serve as a catalyst for the implementation of proper<br/>infrastructure for development.</li> </ul>   |

#### **Table 1: Objectives of Precinct Planning**

In terms of the prioritization of these precinct plans for Ixopo, Precinct Plan 3 proved to be most critical to tackle first since it is a precinct that contains a significant number of business activities currently taking place in the town, it also boasts possession of land parcels that are suitable for future growth and development of the town. These land parcels will unlock a variety of economic activities and at the same time improve the functionality of the town, promote orderly development as well as improve the overall image of this town. Map 1 contains some of the proposed land uses in terms of Precinct Plan

3

2013-2014 Final Sisonke District Municipality - IDP

Map 1: Land use and Urban Design Framework 2013

Precinct Plan 3 provides critical details relating to the desired town image by indicating the type of designs in terms of building, road design outside of the carriageway, traffic movement as well as land uses, all of which correlates with the overall image of this town taking into consideration the role that the lxopo town plays in the district and beyond.

The development principles which will be applied in all the Urban Renewal Programmes within the District during the execution of the interventions need to take consideration of broader framework of intergovernmental relations and democratic principles. With this in mind, some of the Principles that will need to be applied throughout the implementation of the interventions include:

- Integration and alignment between role players
- Environmental considerations
- National and provincial policy directives
- Optimum efficiency
- Acceptable norms and standards
- Accountability
- Transparency
- Pro-poor approach
- Community participation and communication

Kokstad has also developed an Urban Regeneration Plan that has Development precincts for future detailed planning, the precinct for this particular town are broken down as follows:

1. Area to the west of Hope Street up to The Avenue and to the east of Hope Street up to Barker Street.

2. Area to the south of the existing CBD, including the Mamiesa development area, the Engen garage and Merensky.

- 3. Area to the south of Bhonweni.
- 4. Bhongweni, Horseshoe and the area to the immediate north and east thereof;
- 5. Shayamoya, including the Shayamoya landfill site.
- 6. This precinct is bordered by Barker Street to the south, St Patric's college to the north, stream to the east.
- 7. This precinct includes Extension 7 and the area to the north of The Avenue.
- 8. The precinct includes the prison, and borders Hope Street to the east.

Map 2: Kokstad Urban Regeneration Strategy 2012

The above Urban Regeneration Interventions have received a positive reception from the sector departments who have formed part of the process from the beginning. The private sector particularly the business sector was also had representatives into the process, consultation with the identified stakeholders was central to the development of this strategic and forward planning document in order to ensure that stakeholders are able to direct their future investment in the appropriate areas.

Public consultation processed and other print media were used to reach out to the broader public. Positive responses were received and a few concerns which were received and most of them were addressed.

There are obviously some interventions which will ser address the development challenges of the area to a g extent than others. These projects can be considered catalytic projects and should be projects which will serve to start" the development of the precinct and its hinterland anticipated that there will be a logical sequence of interver The catalytic projects will be interventions that will be prior to be implemented prior to the implementation of interventions,

but also those ones that will have the greatest impact on the

to implement the interventions in an optimum sequence, as the availability of funding might influence this sequence.

It would be preferable to attach clear timeframes to the intervention sequence, but it should be acknowledged that this will once again be dependent on the availability of funding. Attaching unrealistic timeframes to the interventions could easily discourage the implementers of the Implementation Framework and could jeopardize the integrity of such implementers and therefore the successful completion of the framework. Although each intervention will be dealt with individually, the proposed process for the implementation of these will need to ensure internal alignment with other interventions.

It is also important to mention at this stage that planning for the secondary nodes as well as tertiary nodes of the district is also underway. The Department of Rural Development and Land Reform is in the process of concluding precinct plans for Underberg, Donnybrook and Highflats nodal areas. The same department will be doing precinct plans for Clydesdale and Rietvlei within Umzimkhulu in the 2012/2013 financial year. As for the Umzimkhulu town, the Urban Regeneration Plan was completed in 2007/2008 calendar years and that study has begun bearing fruits through physical developments such as Umzimkhulu Park and the recent Shopping Centre development in line with the Plan. A partnership with Greater Kokstad

Municipality also saw Sisonke District funding the concept designs for the Kokstad Sports Complex which is inclusive of the park.

Map 3: Underberg Precinct Plan 2013

Map 4: Donnybrook Precinct Plan 2013

In terms of the physical projects that have been undertaken under the Urban Renewal Programme, the Bulwer and Creighton and Himeville Parks were targeted for rehabilitation and beautification. As advocates of open space and green areas, Sisonke District Municipality aim is for a greener environment for the present community and future generations. It is committed to upholding and maintaining Sisonke District towns "green crown" and it will continue to prioritize the parks portfolio in a manner ensuring the this District remains one of the greenest towns in the province of KwaZulu-Natal.

Parks rehabilitation of the Bulwer, Creighton in Ingwe Municipality and Underberg Park in the KwaSani Municipality had positive impacts on investment in these areas as well as contribution to the tourism of these areas. These parks provided areas in which the local people and passerby's could relax and unwind in, they further provided a safe environment within which the children could play in. The location of these parks within strategic points in each of these towns was also advantageous to the local economy and civic pride by making the town an attractive place to work and live in. The construction phase of these parks gave the local contractors an opportunity to develop not just their businesses profile but the greater local communities through the temporary job creation. A minimum of four local community members were employed per project and this was a great success as they also had an input into the design layout since they had the valuable local knowledge that was useful to the success in terms of the use of this facility.

These parks are perceived as special places where all sections of society can enter free of charge and mix freely. Public parks sought to provide clean fresh air to those who are living in increasingly built-up environments. They are essential green lungs for the towns, but they are also priceless environments where residents can relax and revitalize body and soul. Developing the parks was also a way of keeping the edges of town natural. The development of these parks also meant that most of the local children could no longer have access to taverns and many other undesired places for pleasure. Parks basically give the local children a place to go and therefore keeping them off the street.

The shared services personnel have played an important role in the execution of these projects particularly the GIS practitioners who have provided technical support to spatial planning matters in order to make informed decisions on the suitable land for development. Environmental Planning through the Sisonke Biodiversity Sector Plan has also ensured that municipal planned projects do not occur on sensitive and protected areas which assist the Sisonke Family of municipalities to then enforce the same to private developers.

It is projects such as the above that constantly remind the municipality just how little planning effort and community involvement can have unquantifiable social and economic benefit to the communities which we are serving. Any assistance in terms of funding will enable the Family of Sisonke District Municipality an opportunity to implement its vision as contemplated in its Urban Renewal Banner, contribute to the growth of the local economy through the creation of efficient and functional urban centers, minimize the impacts to the environment and help build better communities.

The URP is a priority intervention towards creating spatial equity throughout the district. The outcomes of Urban Regeneration studies and Precinct Plans indicate that these towns have unique challenges, some similar changes, so as well with opportunities. Some common factors are funding and project management. In order to address this challenge, a project charter is proposed to assist municipalities to properly manage the implementation of projects that have been

identified as part of these studies and plans. The funding mainstreaming is also proposed in order to respond to the prioritization of issues. Currently Ixopo and Umzimkhulu and Bulwer towns have been prioritized as the three major urban centres that require urgent funding interventions.

### **Public Transport Planning**

During 2008 / 09 financial year, the SDM finalized the Public Transport Plan which will guide the operations of the SDM as the public transport planning authority. The purpose of the public transport plan is described as the planning document, and a mechanism by which an authority can plan for, developing, managing, integrating and promoting public transport.

Section 26(1) of the National Land Transport Transitional Act (NLTTA) states that a Public Transport Plan must be prepared with a view to determining and specifying the public transport services, provided in terms of the matters listed in sections 23(3)(a) and (b) of the Act. This latter refer to –

• All the scheduled and unscheduled services that are operated in the area concerned, as well as the public transport services operating across the boundaries of neighboring authorities and the facilities and infrastructure currently being developed, or already utilised.

Consequently, it is also interpreted that a Public Transport Plan should address the provision of both the public transport services and the infrastructure and facilities.

**"Section 26(2)** stipulates that Public Transport Plan must be prepared with a view to developing and implementing the integration of public transport services. Therefore the Public Transport Plan should reflect the national and provincial transport policies, for example, several sections in the NLTTA require that Public Transport Plan must be developed to enhance integrated transport and land use planning. Furthermore, in order to plan for the provision of public transport services and facilities, it is also necessary to address matters such as funding, institutional aspects, action plans, projects and performance monitoring. Finally it may be perceived that the PTP facilitates and the overall implementation of the NLTTA, as the focal point of the Act is on developing public transport and related matters. Amongst other issues contained in the plan is the Operating License Strategy (OLS) and Rationalization Plan (RATPLAN).

# **Operating License Strategy**

The purpose of the OLS is to formulate a strategy which will enable the SDM and the local municipalities to provide structured and informed responses to the applications for operating licenses referred to it by the Kwa-Zulu Natal Operating License Board, and to achieve a balance between the effective and efficient supply and utilisation of public transport. The OLS for the SDM area was formulated based on the requirements of the NLTTA, Act 22 of 2000, Part 7, section 24 and the National Guidelines and Requirements for OLS's developed as part of the implementation of the NLTTA, 2000.
#### **Rationalization Plan**

#### The purpose of the Rationalisation Plan is:

- To eliminate inefficiencies within the subsidised bus system where possible.
- To create a framework for the restructuring of tendered bus contracts, taking cognisance of the total public transport system and its modes, in order to obtain a more efficient and cost effective public transport system.
- To in the longer term also address the restructuring of all modes forming part of the public transport system, including inter alia rail concessions and the recapitalisation of the taxi industry.

Considering the approval date of current Public Transport Plan, the SDM is intending reviewing the current plan. This will enable the SDM and all LMs to understand latest public transport supply, demand and infrastructural availability.

#### **Environmental Management**

The SDM approaches environmental management on three dimensions. Firstly, forward planning, this deals with the development of environmental management tools which are a legislative requirement. These tools also enable the Municipality to process of environmental authorization application. Secondly, practical environmental management responses to today's environmental challenges. Hence the SDM is intending to prepare a Climate Change Response Strategy that will assist the municipality to improve infrastructure planning standards so as to respond to current climate challenges. Finally is the public participation in the environmental management. This is aimed at creating public awareness and involvement in environmental protection and conservation.

In line with the resolution of NEMBA (Act 10 of 2004), which provides for the management and conservation of biodiversity in the Republic of South Africa and introduced publishing Bioregional Plans as a new tool aimed at achieving and improving biodiversity management and conservation. Subsequent to this, in the province of KwaZulu-Natal, the Minister declared District municipal boundaries as bioregions and therefore in KwaZulu-Natal, each Bioregional Plan refers to a particular District municipal boundary region

The Sisonke family of municipalities has then prepared the Biodiversity Sector Plan which is a precursor to the Bioregional Plan which serves as an official reference point for biodiversity concerns in a bioregion and both plans are intended to inform land-use planning and decision-making processes by all sectors whose actions, policies and decisions impact on biodiversity (Conservation Planning). Through both Biodiversity Sector Plans and Bioregional Plans, the Sisonke family of municipalities now take into cognisance biodiversity concerns when developing their planning and assessment tools such as IDPs, SDFs, EMFs, etc. Conservation Planning is both critical and necessary in effecting environmental sustainability and ensuring that ecosystem services (benefits that humans obtain from the natural environment) are not compromised by development.

The Biodiversity Sector Plan considered the Biophysical and Biological Characteristics of the Sisonke District Municipal jurisdiction, protected areas and other conservation areas with the intention of safeguarding its natural heritage

(biodiversity), manage and protect ecosystem goods and services within the bioregion for both current and future generations. It also contains recommendations that state, amongst others, the following:

- All district and local municipal level land use planners must consult the BSP map to determine the biodiversity conservation status of land which is under application for development or land use change.
- The land use guidelines within this document must be consulted to determine which land uses and land management types can be authorised based on the biodiversity status of the land.
- When decision making covers land within proximity of municipal boundaries, district and local municipal level
  planners must ensure collaboration with planners from adjacent municipalities, and in accordance with their
  appropriate BSP or environmental plan, regarding alignment of biodiversity conservation planning, and land use
  change applications.

The three phases where biodiversity is important namely are that biodiversity needs itself in order to persist, it supports humans and stabilizes systems that dictate what happens to the planet at large.

The SDM is currently preparing the Strategic Environmental Assessment which is also the requirement of the Municipal Systems Act for the preparation of Spatial Development Framework. This SEA will assist the municipality together with the BSP in assessing development proposal and serve as guide to inform development priorities. The SDM is also willing to prepare the Environmental Management Framework (EMF) which is the more recognized environmental management tool.

Once these tools are completed, the SDM will develop user friendly public participation material. This material will summarize and highlight environmental threats and opportunities for this district. In order to reach the entire population of this district the educational material will also need to be translated to the two most common African languages. Through public participation the SDM in partnership will all LMs have conducted environmental public awareness programmes. These awareness's are conducted in various themes ranging from biodiversity management, invasive alien plant removal, protection of water as a limited resource. These various themes are aimed at assisting the public to protect the environment around them which can also have economic spin off through tourism. The SDM intends to intensify the process of creating easy-read documentation for public education through brochures and flyers.

#### **Geographic Information System**

#### GIS as a Tool in Strategic Planning

GIS assist Sisonke Municipality to identify municipal projects that falls in and outside Sisonke District boundary. Example GIS managed to map water projects that were outside the boundary of Sisonke using GPS Coordinates. It is also been used as a planning and strategic tool by planners and other municipal officials in making informed decision. For example, GIS is assisting in acquiring the base data for the preparation of SDF, Schemes etc.

Currently GIS is establishing web based GIS system which will integrate all departmental information into one database, this will assist in querying of information better. For example how many properties within Sisonke that does not pay water bills. GIS also assists the municipality to see service delivery shortfalls, highlight service delivery gaps, e.g. water and sanitation

backlog, analyse the quality of services and basic service delivery according to IDP objectives. For example, mapping of the MIG projects.

The GIS also support other Local municipalities with GIS Data Update. For example in Kwasani, GIS is been used to Capture the tourism areas. GIS emphasis on rendering spatial information that assists on Integrated Development Planning (IDP) alignment and Spatial Development Framework (SDF's), Schemes, Billing and solution to infrastructural and Disaster Management queries.

#### Integration of Data from government Departments

GIS is assisting the Municipality to acquire various base datasets or layers which allows analysis, query geographic information.

#### Following data are available

- Electricity- from Eskom
- Schools-from Education
- Images- Dept. of Land Affairs
- Cadastre-from Rural development
- Census Data from Statistics South Africa
- Valuation Rolls
- Water and Sanitation- Dept. of Water affairs
- Clinics-Dept. of Health
- Roads-Dept. of Transport
- Households Points-from Eskom
- Pension Pay points
- Demarcation Boundaries

#### Following are the data that we desire to have

- Latest aerial photographs covering Sisonke DM
- Updated Deeds Data
- Update water infrastructure data
- Municipal projects

#### DPSS

The benefits of development planning shared Services is to establish and maintain the district wide information management system interfacing with development administration, Geographical Information System and strategic planning function (IDP, SDF etc). The Role of GIS is to provide support to the planners at municipalities in the operation of the systems.

#### Advantages of web based GIS

The departmental information will be integrated and linked to the GIS information which will allow the municipal officials to be able to access the centralized data base to allow them to query or search information.

The users will be able to print maps of the area or property, including related property data that is available.

#### Data upgrade and management

Following are the projects that require Implementation and funding:

- Capturing and maintenance of Infrastructural Information
- Maintenance of the GIS web Based Systems

#### GIS WEBSITE:

Sisonke District Municipality has finalized the development of Geographical Information Website which integrated all the Departmental information into a centralized Database. The system will enable the Municipal officials to improve their operations timeously decision making as well in strategic planning.

The GIS Unit will be conducting training to the Municipal officials on how to make use of the system and the system can be accessed from the local network and Our IT department is working towards making the GIS system available on the Internet which will enable other external users, Local municipalities and the public at large to access it. The system will enable officials to view municipal projects, search properties, print Maps etc.

#### **GIS POLICY**

Sisonke District Municipality through GIS Unit has developed GIS policy and the purpose of this policy is to:

- Ensure standardization on the use of GIS with a view of maximizing benefits from investments;
- Provide a process for access to both information contained in the Municipal GIS as well as map and data products developed by the system;

The objective of this policy is to outline what constitutes acceptable use of GIS services, including the handling of spatial data information as well as the rules regarding the interception and monitoring of GIS data information. This policy also governs access, use and management of GIS resources. These include personnel, hardware, software, data, procedures, policies and methods, and products related to GIS. All users given access to any municipal GIS resources are expected to have read, understood and comply with this policy.

The policy will oblige all the Municipal Departments to make sure that no project should be undertaken in Sisonke District Municipality without a spatial point, line or polygon being captured to depict where that project occurs. All projects conducted on behalf of the Sisonke District Municipality, with GIS data as part or entire deliverable, shall be supported by the Municipal Manager or his/her nominated individual. A copy of the latest GIS specifications document shall accompany letters of awards and/or contracts for such projects. The GIS Specialist will be responsible for ensuring that there is a one to one match between the project database (IDP, MIG etc) and the GIS spatial data. The project managers must ensure that the project implementers provide the necessary data for capture into the GIS. The Information must be provided in GIS format or access, excel format with reference points (Coordinates: Latitude and Longitude)

#### PROPOSED FUTURE PROJECTS

Formalization of Rural areas is one of the projects which have been identified by planning directorate and the project will entail the following activities:

- Mapping of Households (Eskom and STATSSA)
- Demarcation
- Rural Street Address (SA Post Office)

This project will enable the Municipality to locate the residence physically and spatially as well as to assists other financial Institutions in terms of proof of residence.

# **E 2 IMPLEMENTATION PLAN**

## 2013-2014 Final Sisonke District Municipality - IDP

| Focus Area       |                     |   |   |   |   |                    |  |  | Baseline   | MTEF T  | arget Date an                                      | d Budget   |

# **F:** Financial Management

#### Legislative Background

This growth and the introduction of the Municipal Finance Management Act (MFMA) in 2004 has changed the way the finance department functions from a traditional record keeping function to a key role player in the service delivery process. The budget & treasury office as it is now called, amongst other duties, is responsible for providing the management with useful reports to assist them in managing their budgets and thereby enhancing the service delivery process.

#### **Mission Statement/ Purpose of the Department**

The financial services department is committed to providing reasonable assurance that sound and sustainable management of the fiscal and financial affairs of Sisonke District Municipality is accomplished.

#### The functions of the Financial Services Department

#### **General Financial Management**

- The Department manages the financial administration of the Municipality.
- Ensures economic and efficient use of the Municipality's resources.
- The Department designs, implements and maintains effective, efficient and transparent systems and policies.
- It must account and reconcile on a monthly basis all the Municipality's bank accounts.

#### **Assets and Liability Management**

- The Department safeguards and maintains the economic value of those assets.
- The Department in cooperation with all other departments should ensure that a comprehensive asset maintenance strategic plan is developed, implemented and maintained.
- Ensure that assets and Liabilities registers are opened.

#### **Revenue Management**

- The Department has design a tariff model that recovers all the costs associated with the provision of services.
- The Department should ensure that all consumers of the District Municipality are billed for the service.
- It should have reasonable assurance that the District Municipality has effective and efficient revenue collection systems consistent with the Municipality's credit control and debt collection policy.
- The Department should take care of its indigent members of the community. The indigent register has been compiled.

#### **Expenditure Management**

- The Financial Services Department develops implements and maintains effective system of expenditure control, including procedures for the approval, authorization, withdrawal and payment of funds.
- Ensure accurate and timely recording of accounting information.
- Ensures that all statutory commitments are paid in time.
- Provide reasonable assurance that payments are made within 30 days of receiving relevant invoice or statements.

#### **Budget Preparation**

- The Financial Services Department co-ordinates the compilation of the master budget of Sisonke District Municipality in terms of the Municipal Finance Management Act format.
- In carrying out the duty outlined above, this section ensures that the Mayor tables to council 10
  months before the start of the financial year a schedule of key deadlines for the preparation of the
  budget that ensures a comprehensive consultative process, which is done through Izimbizos.
- Submits the budget to the Accounting Officer for further submission to Council and Provincial Treasury Department.
- Ensure that a draft budget is tabled to Council 90 days before the start of a financial year.

#### Reporting

- Financial Services Department must by no later than 10 working days after the end of each month submit to the Accounting Officer a statement on the state of the Municipality's budget.
- The department must prepare a mid-year budget & performance assessment in order to enable the Accounting Officer to assess the performance of the municipality during the first half of the financial year and also to assist him recommend whether:-
  - An adjustments budget is necessary; and
  - Recommend revised projections for revenue and expenditure to the extent that this may be necessary.

#### **Financial Reporting**

- The Financial Services Department must prepare for each financial year a set of annual financial statements.
- Submit the Annual Financial Statement to the Office of the Auditor General within 2 (two) months after the end of the financial year to which those statements relate.
- The department must also submit section 22 (b) as well as section 71 reports.

#### **Supply Chain Management**

- The financial Services Department administers the Supply Chain Management process.
- The department is responsible for the administration of Bid Committees.
- Ensures the economic and efficient use of resources in relation to the all kinds of inventory that is stored for derivation of maximum economic benefit for the Municipality.

#### Challenges

The following are the changes some of which have come about with the implementation of the MFMA.

- Budget implications associated with the establishment of a Supply Chain Management (SCM) & Budget and Treasury unit requiring skilled expertise.
- Enhancement of own Revenue sources (see figure 2 below)
- Changes in the reporting formats and municipal accounting standards requiring compliant financial systems and the implementation thereof.

#### Addressing Challenges

- The SCM unit with its bid committees and the budget office has been established.
- The new financial system will provide the much needed support in the functioning of these units.
- Revenue enhancement: The data cleansing & verification process coupled with the implementation of the new financial management system will certainly improve the municipality's revenue management.
- Expenditure reports have been submitted to the Provincial Treasury and full compliance to the MFMA
- In the previous financial years, a partial response to addressing the issues raised in the audit reports existed and currently, finance is working on devising a detailed strategic plan to address the issues raised in these reports.

### BUDGET 2012/2015

### 1. REVENUE

### **BUDGET FUNDING**

|   | BUDGET        |
|---|---------------|
| Government grants & subsidies - operational | R 220 310 000 |

#### RECOMMENDATION

It is recommended that;

- 1. The Council notes the increase of 8% in Tariff Charges,
- 2. The Council Notes the 2013/2014 MTREF Draft Budget as tabled in terms of Section 16(2) of the MFMA and that the public and all relevant stakeholders make comments on the tabled draft budget.

#### **BUDGET POLICY**

#### OBJECTIVE

The policy sets out the budgeting principles in line with the MFMA and Municipal Budgeting Reporting Regulations which Sisonke District Municipality must follow in preparing each annual budget.

#### AMMENDMENTS

- Materiality of the Capitalisation Value R10 000 to R 5 000 in line with asset management policy.
- Alignment of responsible incumbents (Posts) to the Sisonke Organogram
- Removal of "Property Rates" and "Rental Income" as a funding source.
- The budgeted percentage of R&M changed from "10% of total operating budget" to "7% of total Property Plant & Equipment"
- To comply with the Municipal Budgeting Reporting Regulations in terms of preparation, tabling, and adoption.

#### VIREMENT POLICY

#### OBJECTIVE

To provide a framework to give the HOD's greater flexibility in managing their budgets whereby certain transfers between line items within votes and between votes may be performed with the approval of certain delegated officials.

#### AMMENDMENTS

- In insertion of; Transfers between or from Capital projects to obtain approval from EXCO;
- Amounts to a maximum of R500 000 must be authorised by Chief Financial Officer;
- Amounts to a maximum of R1000 000 must be authorised by Municipal Manager;
- If transfer exceeds R1million, the transfer must be authorized by EXCO on the recommendation of the Municipal Manager.
- All virements must be signed by the HOD of the requesting department;
- All virement requests must be submitted to CFO's office via the budget office;
- All monthly virements must be reported to EXCO as part finance monthly reports.
- Change from 8% to 30% of the total amount transferred from and to line items within a particular vote in any financial year of the amount allocated to that vote.

• Change from 8% to 15% of the total amount transferred from and to line items in the entire budget in any financial year of the total operating budget of the specific department for that year.

#### BANKING AND INVESTMENT POLICY

#### OBJECTIVE

The purpose of this policy is to ensure that investment of surplus funds forms part of the financial system of the Municipality and to ensure that prudent investment procedures are consistently applied.

#### AMMENDMENTS

- Interest accrued shall be recorded as operating revenue in compliance with Generally Recognised Accounting Practice.
- The interest earned on invested conditional grant funding shall be recognised as own revenue in terms of Generally Recognised Accounting Practices.

#### **FUNDING & RESERVES POLICY**

#### OBJECTIVE

This policy intends to set out the assumptions and methodology for estimating the following:

- Projected billings, collections and all direct revenues;
- The provision for revenue that will not be collected;
- The funds the municipality can expect to receive from investments;
- The dividends the municipality can expect to receive from municipal entities;
- The proceeds the municipality can expect to receive from the transfer or disposal of assets;

#### AMMENDMENTS

- THE FOLLOWING LIABILITIES SHALL BE CASH BACKED
- Unspent conditional grant funding
- Retention on projects
- Consumer deposits
- The municipality must ring fence the conditional grants through a specific investment account.

#### ASSETS MANAGEMENT POLICY

#### OBJECTIVE

The purpose of this policy is to ensure that effective management of the asset is adhered to and is in line with Generally Recognised Accepted Program, giving effect to basic service delivery to the community of Sisonke District Municipality.

#### AMMENDMENTS

Materiality of the Capitalisation Value R2 000 to R 5 000 in line with asset management policy

#### TARIFFS POLICY

#### OBJECTIVE

The purpose of this policy is to cover, among other things, the levying of fees for municipal services provided by the municipality itself or by way of service delivery agreements in accordance with Section 74 of the Local Government: Municipal Systems Act 2000.

#### AMMENDMENTS

This policy has been amended to reflect the 8% increase in water and sanitation tariff charges for 2012/13 budget.

### SWOT ANALYSIS

| SWOT ANALYSIS   |  |  |  |  |
|---|--|--|--|--|
| STRENGTHS   | WEAKNESSES   |  |  |  |
| <ul> <li>Billing done every month</li> <li>Good billing system in place</li> </ul>  | <ul> <li>Inaccurate billing</li> <li>Use of system functionalities not<br/>maximised</li> <li>Poor collection levels</li> <li>Policies not reviewed for relevance</li> <li>Inaccurate consumer data</li> <li>High vacancy rate</li> </ul>        |  |  |  |
| <ul> <li>Salaries, third party and statutory<br/>payments paid on time.</li> <li>Payments processing has improved</li> <li>Document management has improved</li> </ul>  | <ul> <li>Lack of systems to monitor late payment<br/>of creditors.</li> <li>Lack of regular intervals to perform<br/>reconciliations and reviews.</li> <li>Payments of interest and penalties on<br/>overdue accounts.</li> </ul>                |  |  |  |
| <ul> <li>Budgeting unit fully staffed</li> <li>Improvement in National Treasury<br/>Reporting compliance.</li> <li>Monthly income and expenditure<br/>reports sent to all departments</li> <li>Improvement in budget control and<br/>account allocation on requisitions.</li> </ul> | <ul> <li>Inadequate financial management<br/>systems to deal with reporting (monthly-<br/>annual financial statements).</li> <li>Inadequate budget planning by user<br/>department creating challenges in<br/>budget implementation.</li> </ul>  |  |  |  |
| <ul> <li>Improvement in the monitoring of<br/>irregular expenditure</li> <li>Improvement in the functioning of the<br/>SCM bid committees</li> <li>Improvement in SCM processes</li> </ul>  | <ul> <li>Non-compliance with relevant SCM<br/>legislative prescripts</li> <li>Non adherence to procurement plan by<br/>user departments</li> <li>No system in place for rotation of<br/>suppliers</li> </ul>                                     |  |  |  |
| OPPORTUNITIES   | THREATS  |  |  |  |
| <ul> <li>New industry developments expanding<br/>the revenue base.</li> <li>New housing developments.</li> <li>Provincial Treasury support on improving<br/>accounting processes.</li> </ul>  | <ul> <li>Increasing consumer debt on new developments.</li> <li>Urban migration (Fiscal leakages)</li> <li>Service providers not wanting to do business with the municipality due to late navements.</li> </ul>                                  |  |  |  |
|   | <ul> <li>late payments</li> <li>Possibility of a decline in future<br/>government grants and subsidy<br/>allocations due to the economic decline</li> <li>Decline in population which could affect<br/>the grade of the municipality.</li> </ul> |  |  |  |
| <ul> <li>Provincial Treasury support in<br/>strengthening SCM processes.</li> </ul>   | <ul> <li>Collusion in the construction industry<br/>leading to higher than the market prices<br/>of bids.</li> <li>Staff turnover leading to finance<br/>employees being attracted to better<br/>salary package offers elsewhere.</li> </ul>     |  |  |  |

### **G:** Annual Operational Plan (Draft SDBIP)

Section 1 of the Municipal Finance Management Act defines the Service Delivery and Budget Implementation Plan (SDBIP) as a detailed plan approved by the mayor of a municipality in terms of section 53(1) (c) (ii) for implementing the municipality's delivery of services and the execution of its annual budget and which must include as part of top layer the following:

- 1. Projections for each month of
  - (a) revenue to be collected, by source and operational and capital expenditure, by vote,
  - (b) service delivery targets and performance indicators for each quarter

The process of developing SDBIP commenced within 14 days after the adoption of final IDP/Budget by council. The process is informed by the following five key components:

- 1. Quarterly projections of service delivery targets and performance indicators for each vote
- 2. Ward information for expenditure and service delivery and
- 3. Capital works plan by ward

The plan will serve as an implementation tool and will assist in monitoring performance of the municipality in terms of set targets.

The Sisonke Service Delivery Budget and Implementation is currently in a draft stage and will be tabled to the Mayor 14 days after the draft IDP/ Budget has been tabled to Council.

### DRAFT SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN

#### H: Organizational Performance Management System

#### Context

The system allows for departmental performance reviews monthly, quarterly, bi-annually and annually. The Executive Committee performance reviews will be conducted quarterly and the Council and public review will be done annually.

The Municipal Manager will coordinate and ensure good quality of reporting and reviews and will also ensure conformity to reporting formats and check the reliability of reported information where possible.

In terms of auditing of performance reports, the municipality is established an Internal Audit Unit in a form of Shared Services Model. Also the Audit Committee was established in terms of section 166 of the Municipal Finance Management Act (No 56 of 2003).

#### Legislation

The Municipal System Act No. 32 of 2000 holds that a municipality must-

- Establish a performance management system that is-
- Commensurate with its resources;
- Best suited to its circumstances; and in line with the priorities, objectives, indicators and targets contained in its integrated development plan;
- Promote a culture of performance management among its political structures, political office bearers and councilors and in its administration and administer its affairs in an economical, effective, efficient and accountable manner.

#### **Development of performance management system**

The executive committee or executive mayor of a municipality or, if the municipality does not have an executive committee or executive mayor, a committee of councilors appointed by the municipal council must-

- Manage the development of the municipality's performance management system;
- Assign responsibilities in this regard to the municipal manager and
- Submit the proposed system to the municipal council for adoption.

#### Progress with regard to development / Implementation of PMS

The District prides itself for managing to develop a system that is functionally and that is used by all concern as a tool that helps to measure the organizations performance.

Sisonke has revised its Performance Management System and as such has developed the Organisational Scorecard that will assist to measure the performance of the organization. Please see the attached document.

#### **SECTION J**

#### Annexures

In the past few years Sisonke District Municipality has had good working relations with other government and public institute. But in recent times the situation has since deteriorated so much so that in the stakeholders meeting that was held in February 2013 a total of 15 government departments were invited but only 5 could attend. There are a number of reasons that can be attributed to this situation, among others, is the possibility that others feel that Operation Sukuma Sakhe is a sufficient platform that can be used to support municipalities or there is a limited staff compliment and thus some of the meetings are overlooked or there is a total breakdown of communication between all parties. No matter what the situation is, the non-attendance of meetings by government departments has had adverse impact particularly in creating synergistic partnerships as well as the much needed alignment to optimize the scarce resources.

As part of our mandate, that of deepening democracy and enhancing public participation, Sisonke District Municipality together with its sister municipalities has standing public participation meetings in the form IDP Izimbizo in every October and April. These joints public meetings have yielded great results over time, particularly in joint planning. There is however still a room for improvement.
