BIOMETRIC ACCESS CONTROL

Biometric technology is very useful for ID verification in a range of government organizations, banks financial institutions, and high-security areas. Biometric systems are capable of recognizing people swiftly, consistently, and reliably. One of the main advantages associated with biometric technology is high individual identification accuracy. Biometrics relies on the use of unique physical traits, such as a fingerprint, an iris pattern, or facial characteristics rendering biometric technology a very accurate technique for authenticating end users. Superior accuracy is why a lot of organizations use biometrics for security purposes. Since biometric characteristics cannot be conjectured or stolen, biometric systems present a superior level of security than usual means of authentication. Biometric technology is less exposed to damage and sudden changes. The behavioral and physical elements accessed for biometric verification like iris/retina, voice, pulse, DNA, vein, etc. are less in danger of damage and sudden changes.

BACKGROUND

The Municipality invites suitably qualified and credible service providers to supply, install, and maintain a Biometrics Clocking System. The Service provider will be required to supply, install, and maintain for a period of 36 Months a biometric clocking system that interfaces with the current ICT Systems of the Municipality and integrates with the payday Payroll System and records management system. The software must also feature an access control system for the Municipality. The Biometric clocking system must have the following options: face, finger, and card access, for the listed premises, which interfaces with the current ICT systems within the Municipality and integrates with the payday Payroll System and records management system.

The main objective of the biometric system includes but is not limited to:

- a. Monitor overtime and late coming.
- b. Ensure employees arrive and depart from work at the required times.
- c. To improve productivity and service delivery for the Municipality.
- d. To provide accurate timekeeping for the Payroll Unit.
- e. To provide and maintain access-controlled security across all the organization's facilities or offices with high standards and modern biometric technology.
- f. To enhance security by ensuring that the biometric devices are always operational.
- g. To ensure that the faulty biometric devices are identified
